At SPAR-Marathon, We're Proud of Our Roofing Heritage

SPAR – Brings a family tradition in roofing dating back to 1875 in the same city.

Marathon – A name known for roofing products since 1912.

Today SPAR-Marathon is a diverse roofing products company manufacturing and distributing a wide range of roofing products.

We're proud to offer a proven track record for customer service and customer satisfaction and years of supplying high quality and dependable products to the roofing industry. We hope we can be of service to you.

A division of Spar Roofing & Metal Supplies Limited

SPAR-Marathon Roofing Supplies is proud to share the commitment of Education, Safety Awareness and the overall betterment of the Roofing Industry, through our active support and participation in the following professional associations:

Cedar Shake & Shingle Bureau

SERVICE IS OUR SPECIALTY · SPAR-Marathon

SPAR-Marathon's policy is one of continuous improvement. We reserve the right to change the specification or design of any of our products at any time.

The manufacturers whose products we distribute are also continually changing and updating their products and therefore we cannot be held responsible for any incorrect or outdated information.

The utmost care is taken in the production of this catalogue. However, we cannot be held responsible for any errors or omissions.

SPAR-Marathon Roofing Supplies

is on the forefront of the Roofing Industry. We are continually searching for new and updated products and improving our service to our customers.

If you have any questions or would like further information on any of the products we sell, please contact us by mail, e-mail, fax, or by telephone.

1 decameter = 393.7 in. = 10 yd. 2.8 ft.
1 hectometer = 328 ft. 1 in.
1 kilometer = 3,280 ft. 10 in.

SOUARE

1 square millimeter = .00155 sq. in.
1 square centimeter = .155 sq. in.
1 square meter = 10.764 sq. ft. or
1.196 sq. yd.
1 square kilometer = .3861 sq. mile
1 acre = 4046.856 sq. meters = 4840 sq. yd.
= basic unit in measuring land

CUBIC

1 cubic millimeter = .000061 cubic inches 1 cubic centimeter = .0610 cubic inches 1 cubic meter = 35.314 cubic feet = 1.3079 cubic yards

METRIC EQUIVALENTS, LIQUID OR FLUID MEASURE

Liquid Drv 1 centiliter (cl) = .6102 cu. in. = .338 oz. 1 deciliter (dl) (10 cl) ... = 6.102 cu. in. = .845 gill 1 liter (I) (10 dl) = .908 qt. = 1.0567 qt. 1 decaliter (dal) (101) = 9.08 qt. = 2.64 gal.

MEASURES OF LENGTH or LINEAR MEASURE 12 inches (in.) = 1 foot (fl.)3 feet = 1 yard (yd.) $5^{1}/_{2}$ yards or $16^{1}/_{2}$ feet = 1 rod (rd.) 320 rods or 5280 feet = 1 mile (mi.) MEASURES OF SURFACE or SQUARE MEASURE 144 square inches (sq.in.) = 1 square foot (sg.ft.) 9 square feet = 1 square yard (sq.yd.) 30% square yards = 1 square rod (sq.rd.) 160 square rods = 1 acre(a)640 acres = 1 square mile (sq.mi.) MEASURES OF VOLUME or CUBIC MEASURE 1728 cubic inches (cu.in.) = 1 cubic foot (cu.ft.)27 cubic feet = 1 cubic yard (cu.yd.) LIQUID MEASURE 4 gills (gi.) = 1 pint (pt.)2 pints = 1 quart (qt.)4 quarts = 1 gallon (gal.)DRY MEASURE 2 pints (pt.) = 1 quart (qt.)8 quarts = 1 peck (pk.) 4 pecks = 1 bushel (bu.)**MEASURES OF WEIGHT (Avoirdupois)** 16 ounces $(oz_i) = 1$ pound (lb_i) 100 pounds = 1 hundredweight (cwt.)2000 pounds = 1 ton (t.)MISCELLANEOUS MEASURES 1 gallon occupies 231 cubic inches 1 cubic foot contains about 7.5 gailons 1 cubic foot of water weighs about 62 pounds 1 bushel occupies 2150.4 cubic inches (approx 1¼ cubic feet) 1 barrel contains about 311/2 gallons MEASURES OF ANGLES AND ARCS 60 seconds (") = 1 minute (') 60 minutes = 1 degree (°)90 degrees = 1 right angle or quadrant 360 degrees of arc = a circle METRIC MEASURES OF LENGTH 10 millimeters (mm.) = 1 centimeter (cm.) 10 centimeters = 1 decimeter (dm.)10 decimeters = 1 meter $(m_{.})$ 1000 meters = 1 kilometer (km.)

1 meter = 39.37 in. - 1 km. = .62137 mi. - 1 inch = 2.54 cm.

Capacity of Round Pipes

To find diameter of circle. multiply circumference by .31831.

of by

To find area of circle, multiply square of diameter by .7854.

METAL JOINING GALVANIC ACTIVITY

Aluminum

Zinc

Galvanized Iron Tin Plate Lead Stainless Steel Copper Monel

Metals far apart in table should not come in contact with each other

THERMAL E	THERMAL EXPANSION FACTORS				
Metals	Inches per Deg. F per Inch Length				
Aluminum (wrought)	0.0000128				
Bronze	0.0000101				
Copper	0.0000098				
Led	0.0000159				
Monel	0.0000078				
Steel	0.0000067				
Tin	0.0000825				
Zinc	0.0000178				

Total expansion (E) equals the span (S) in inches of material TIMES avg. temperature difference between winter and summer (100 degrees F) TIMES factor (F) $E = S \times 100 \times F$ Example: Find the expansion allowance for a 20 foot length of copper flashing $E = 20 \times 124.000098 \times 100 = 0.235$

Gutters and Downspouts

Recommendations:

- 1) Gutter slope = 1'' to 16' minimum.
- 2) Gutters under 4" wide should be avoided.
- 3) Leaders spaced less than 20 ft. apart will take same size gutter as leader.
- 4) Leaders spaced over 20 ft. apart add 1" to leader dia. for each 30 ft. of peak roof, or each 40 ft. of flat roof.
- 5) Corrugated downspouts in freezing climates.
- 6) Expansion slip joints set 30 ft. apart.
- 7) General rule: 1 sq. in. of leader for each 100 sq. ft. of roof area.

You can use the above chart to help calculate custom metal orders. By using the decimals on a calculator you can easily add any measurements E.G. The following profile would be calculated on a calculator as follows:

1-1/8 + 1-1/4 + 1-5/8 + 2-1/16 + 1/2

1.125 + 1.25 + 1.625 + 2.0625 + .5 = 6.5625

Total Girth of Flashing 6-9/16

Stock Metal Flashings

Stock Metal Flashings

Sheet Metal

We stock sheets, and coils and mini coils in selected products.

Chimney Pans

- · galvanized or pre-painted
- · wide variety of sizes and colours
- available as a pan only or complete with flashing accessories

We offer:

- galvanized
- pre-painted
- copper
- · lead coated copper
- mill aluminum
- pre-painted aluminum
- a variety of gauges and sizes

Zinc, Moss and Mildew Preventer

Apply zinc strip to both sides of ridge cap. Rain will release zinc, killing moss, mildew and algae. For shingle, shake or tile roofs.

Available in 50' x 2-3/4" rolls.

Tall Cones

- for Pitch or Flat Boofs
- strong galvanized construction
- collars available for exact fit
- · wide variety of sizes stocked
- custom sizes available

Galvanized Pitch Pans

- available in one standard size
- custom sizes available

Pre-Primed Pitch Pans

- · available in a variety of stock sizes or custom made
- · base and sides are pre-primed
- base has filled in corners to provide complete square base
- · opens up for easy wrap around installation

42 SHEET METAL PRODUCTS

Regular Scuppers and Cant Scuppers

- galvanized construction
- water-tight solder
- 3" and 4" stocked
- custom sizes available
- available in short or long versions

#5951 Bathroom Vent

- low profile and compact design
- used for mobile homes, venting for fan exhaust and weatherproofing exhaust pipes
- built in flapper keeps out insects and hirds and eliminates the need for screens
- 4" pipe attachment

Rain Caps

- stocked in a variety of standard sizes
- custom sizes available

Aluminum Hoppers

- spun aluminum roof drains in 3" & 4"
- your most economical choice for drainage
- available with ring and standard strainer or eavestrough style wire strainer insert
- can also be used as a pitch pan

Four Nipple Electrical Flashing

 EPDM and TVP boot designed for 4 separate wiring locations, each with their own variable diameter cut-out.

RV28 Roof Mount Exhaust Vent

It's molded in one-piece; so, there are no joints on the outside surface to allow easy water penetration.

Features UV protected polymer resin, removable screen and damper. Goose neck design keeps vent above snow cap. Maintenance free, will not rust or dent and there are no leaky seams on the vent hood.

Hood Size: 7.5" x 7.25" x 9.5" Snow Clearance: 5" Colours: Black, Dark Brown, Light Grey, Dark Grey

CALGARY, AB

(403) 255-8236

Multi-Wire Insulated Cobra Head Electrical Flashing

- PVC head allows for up to 4 shielded electrical cables with weather tight seal
- Factory insulated base with 3/4" thickness polyurethane foam

B-Vent Flashings

- Available in regular or pitched
- Sizes available in 3"-12"
- Collars are also available (pictured below)

Rain (Chimney) Caps

Available in sizes 3"- 8"

- Available in sizes 6" and 8"
- Available in Galvanized and various colours

SPAR-Marathon • www.sparmarathon.ca

The Keepa Attic Vent

Built solely for Flat Roof Ventilation (a roof pitch that is 2/12 or less). Attic Vents relieve humidity during the winter and heat during the summer to help extend roof membrane life. The Keepa Attic Vent is typically used for ventilating attics as a roof exhaust vent or as an air intake roof vent.

Model KV-8
Inside Diameter 8"
Outside Diameter 11.5"
Standard Height 15"
Collar Height 11"
Free Area 50 sq in

46 SHEET METAL PRODUCTS

Dryer Jack Roof Vent For Flat Roofs

- Flapper closure deters bird and rodent entry
- Collar and curved damper maximize airflow
- Water-tight collar doubles weather protection
- Access door accommodates cleaning tools
- · Built in curb mount

Extra-Clearance Exhaust Vent

When you need room to accommodate heavy snowfall, the extra clearance DryerJack 486 provides more clearance above the roof. Comes in Brown, Black and Galvalume.

- Flapper Closure Deters Bird and Rodent Entry
- Collar and Curved Damper Maximize Airflow
- Water-tight Collar Doubles Weather Protection

Flexible Insulated Ducting

Flexible insulated duct can be installed in place of galvanized pipe in most applications. 4" x 25 ft and 6" x 25 ft.

SPAR-Marathon

www.sparmarathon.ca

SHEET METAL PRODUCTS/VENT STACK FLASHINGS 47

SPAR-Marathon Vent Stack Flashings are used to ensure a waterproof seal between the roof membrane and the vent stack pipe. They are recognized as good insurance on roofs prone to large degrees of movement of the roof deck.

Stack Base and Cap

- spun from one piece of heavy gauge aluminum without welded seams that might leak
- · simple and easy to install
- telescoping action of vent stack caps allows for roof deck movement
- cap can fit 3" or 4" pipe
- hub will accommodate insulation for prevention of condensating moisture on inner pipe
- wide flashing flange promotes ease of installation and greater adhesion area
- stack will accommodate a maximum 16" (407 mm) and minimum 9" (282 mm) existing pipe height

Non-insulated Stack Breather

- · can be used as a stack flashing or breather
- vandal proof no removable parts
- spun from one piece heavy gauge aluminum (no seams to leak)
- 1" perforated holes for maximum air flow
- will accommodate up to 6" diameter pipe

Insulated Stack Breather

- · same design as non-insulated stack breather
- includes insulation for prevention of condensation
- will accommodate up to 4-1/2" diameter pipe

SPAR-Marathon insulation breathers and vents are used to prevent moisture vapour from becoming trapped in the roofing system. They are recognized as good insurance against blistering, cracking and crazing (alligatoring) of membrane, while helping to maintain thermal design efficiency.

Aluminum Insulvent I (one way)

- · low cost, all metal breather used for venting all types of insulation
- spun from heavy gauge aluminum
- an extra wide 4" base opening and securely attached cap
- · one-way value design prevents moisture from re-entering the roofing system
- unique vandal proof cap design shields against entry of windblown rain or snow
- · recommended spacing: 1 per 1000 sq ft

Options

Foam Insert

prevents moisture from condensing on the inside of the standpipe

One Way Valve Insert

 our exclusive one way valve insert is a small disk that allows the breather to be only a one way breather. (breathes out but not in)

CALGARY, AB (403) **255-8236** EDMONTON, AB (780) 432-2786 WINNIPEG, MB (204) **338-7613**

Copper Roof Drains

The result of years of experience and development, **SPAR-Marathon** Copper Roof Drains provide the most versatile, quality copper drains for virtually any application, from new roof construction, re-roofing and maintenance.

They are economical, durable and easy to install. They can be joined quickly to any drain pipe and will bond securely to any roof membrane, cutting time and costs on installation and ensuring long, trouble-free service.

SPAR-Marathon Copper Roof Drains can be custom fabricated so that special requirements, restrictions or tolerances may be met. Optional flange coatings that will allow the drain to meet varied membrane attachment applications can also be provided. **SPAR-Marathon** can also provide connectors for fitting the copper drains to existing conductor pipe.

Whatever your roof drain application, **SPAR-Marathon** Copper Roof Drains will fill the requirements ... saving time, reducing costs and giving performance satisfaction.

Our exclusive Perforated Ring ensures proper water flow down the drain.

Other manufacturers need a buildup of water before overflowing above their rings; the result is often improper water flow or ponding. The **SPAR-Marathon** ring also securely locks the strainer in place, providing a superior roof drain system.

SPAR-Marathon Perforated Ring

Copper Roof Drains Funnel Type

Long life drains consist of an 18" diameter, 20 oz. (0.27) spun copper flange, with slight corrugations, soldered to a seamless copper pipe. The flange is coated with a bituminous paint to ensure a good bond with the roof membrane. May be specified unpainted for use with generic materials other than asphalt.

Beehive Strainers

- this proven design has years of usage
- 8" for funnel type drains and 5" for straight type
- available in cast aluminum and plastic

Aluminum

Plastic

Drain Sealant Tape

- ensures a long lasting watertight seal
- the tape is a high density, elastic foam impregnated with modified asphalt
- the tape is compressed to approx. 25% of it's uncompressed dimensions

Instructions

- · cut tape to desired length
- peel off release liner and wrap around drain stem and insert drain quickly
- tape expands to create a seal against water back up

Available in 1-1/4" x 4 m rolls or we can pre-install it on drain

RD Series Aluminum Roof Drains Available in the following configurations:

RD 28 - Funnel-type 3" - 6" diam

RD 28 RR - Retrofit, funnel type 2.75" - 5.75" diam. (optional EPDM Super Seal available)

RD 29 - Straight-type 3"- 6" diam.

RDX30-A-RR RETROFIT ROOF DRAIN (Aluminum, Funnel Type Outlet)

The Thaler RDX30-A-RR Super-Seal Roof Drain consists of a vandalproof cast aluminum strainer, aluminum strainer retainer, membrane compression unit, deck flange with funnel type straight aluminum outlet. Ideal drain for BUR, EPDM, TPO & SBS where a membrane Clamping Ring is desired; Available to receive a Super Seal or "U" Flow.

Sizes for Retrofit 1.75"-2.75"-3.75"-4.75"-5.75" Sizes for New Work 2.00"-3.00"-4.00"-5.00"-6.00"

The RoofGuard Drain Cap Makes Roof Drains Uncloggable

RoofGuard Eliminates Standing Water

- Patented design increases surface area by 5X or more, making a RoofGuard protected drain virtually uncloggable.
- Eliminates leaks and costly repairs caused by clogged drains.

RoofGuard is simple to use

- RoofGuard will replace existing roof drain domes.
- Installation is fast, simple, and requires no tools.

Aluminum/Copper Hercules

- Aluminum Hercules has a one piece spun aluminum body and cast aluminum clamping ring
- Copper Hercules is made of two parts: copper drain flange welded to copper drain stem pipe
- Available in 3", 4", 5" and 6" sizes

DEBRIS FLOATS ABOVE

WATER FLOWS BELOW

Drain Seal

- Mechanical compression seal creates water-tight connection
- Available in 3", 4" and 6" sizes

Drain Seal Screwdriver Other U-Flow products also available

Standard Metal Roof Deck

Light Zinc Coat Roof Deck 22 GA. Available in 36" x 96" panels. Custom lengths available by special order.

Lead Sheet

- · Comes in easy to handle roll
- 18" x 4' x 1/32"
- Very malleable
- Excellent for forming around pipes, etc.

62 METAL ROOFING/CLADDING

Steel Cladding

Commercial Rib resembles the oldstyle batten seam metal roofing, and is installed without the inconvenience of fastening metal clips or caps. Can be used for both roofing and siding.

Universal Rib panel is rugged and durable, it'll keep commercial and industrial buildings looking new for years to come.

On new structures, Industrial-Metro gives a sharp high-tech appearance; on older buildings or renovation projects, it updates the appearance yet harmonizes with existing designs.

This asymmetrical design features strong 1-1/2-inch deep ribs that are an attractive choice for a siding or roofing profile on commercial and industrial buildings.

Utility Panel provides maximum economy, spanning 39.375" and can be installed over purlins at 48" centres.

Corrugated 7/8" can be used as roofing or siding and is roll formed in lengths of up to 40 feet. This panel is available in widths covering 36" or 27-1/2".

Now available as a vital part of the insulated "sandwich wall system" supporting the insulation and sealing off the building from the inside.

64 METAL ROOFING/CLADDING

Canadiana Siding - 80,000 psi. Full hard steel. Very econmical option for steel siding while providing superior strength. Profile can also be reversed upon request.

JR Heritage Series - 1" Rib height. Hidden fastener snap system, easy to install, no clips and no seamer necessary. Has the ability to curve on solid backing for convex roof, depending on the radius.

Installed on vertical and horizontal applications, the Capital Siding panel with its 3" deep corrugations provides aesthetic and strength which makes it a wise choice for industrial and institutional buildings.

Designed with a unique concealed fastener system for vertical and horizontal siding, fascia and soffit applications, the Urban Accent[™] panel's end result is a smooth and clean appearance.

Gutter Getter Scoop

Made of durable polypropylene, the flexible tip conforms to any size gutter. The extended tongue reaches under gutter supports and the high handle position protects hands from scrapes and scratches.

Zip Hinge

The Zip Hinge ensures that the downpipe extension remains firmly attached to the downpipe to protect the home's foundation.

It also provides convenience for moving and working around the downpipe extension (mowing, landscaping, etc.).

We manufacture two styles of ladder hoists. Why? – Because that's what our customers asked for. Some customers prefer the styling and benefits of the LH Series, while other customers prefer the LPH Series. Both hoists incorporate similar design features such as our superior band brake system, heavy duty ladder sections and splice plates and high quality, heavy duty componentry, providing you durability and long life.

LH-250 Ladder Hoist

Features

Superior Band Brake System

- self locking brake with non-asbestos brake pad and steel brake drum
- foot control belt clutch with one hand operation
- sealed ball bearing wheels, pulleys and sheaves for longer machine life
- self contained 16' ladder hoist needs no assembly
- 200 lbs. capacity

Options

- gravel hopper
- roller angle guide
- telescopic support for heights over 28 feet
- additional ladder sections
- power drives:
 - 4 HP Honda engine
 1.5 HP Electric
 - 110-220 60 cycle

Gravel Hopper

Clamps on platform and discharges gravel when it reaches top of ladder.

Roller Angle Guide Designed for receiving shingles at top of ladder.

LPH Ladder Platform Hoists

Features

- · easy to operate and assemble
- lightweight and portable
- easy access to power pack for maintenance and service
- comes complete with 16', 8' and 4' heavy duty ladder sections, heavy duty splice plates and everything you need to get the job done
- ladder sections can extend height to 44' with telescopic support

Superior Band Brake System

- self locking brake with non-asbestos brake pad and aluminum brake drum with steel ring
- far superior to similar style ladder platform hoists
- sealed ball bearing wheels, pulleys and sheaves for longer machine life

Options

- gravel hopper
- roller angle guide
- telescopic support for heights over 28 feet
- plywood/panel carrier attachment
- additional ladder sections
- power drives: - 4 HP Honda engine – 1.5 HP Electric 110-220 60 cvcle

	LPH-250	LPH-400
Load Capacity	200 lbs.	400 lbs.
Lift speed	220 fpm	110 fpm
Platform size	17"x18"	24"x28"
Ladder width	17"	24"

Safe Operation

- operator stands well back from moving platform
- · two handles work independently to eliminate operator error
- single handle brake operation, single handle clutch operation

Optional Wheel & Handle Attachment

For easy maneuverability.

Telescopic Ladder Support

Extra support for ladder on heights above 28 feet

Retrofit Cable Guard For Trolley Track Hoists

 Safely protects your operator

Trolley Track Hoist

- Heavy duty design with 9 HP Honda engine power unit for TT 1000.
- Height adjustment on front and rear legs.
- Superior band brake system including aluminum brake drum with steel ring and non asbestos brake pad.
- Equipped with heavy duty flanged self locking bearings for longer machine life.
- Power unit controlled by two levers with safety ratchet and pawl to prevent load from accidental lowering during operation.
- Easily assembles on the roof in minutes with self locking pins.
- Available in heavy duty TT 1000 lbs. version or TT 400 lbs. for smaller requirements.
- Also available: hydraulic power pack.

Hoist Counterweights

- -
- concrete filled galvanized steel encased
- pre-punched for positive nesting
- approx. weight 55 lbs.

- empty counterweight casing
 - ideal for shipping
 - customer can fill later

- all steel
- thin design
- will not shatter or break
 like concrete
- approx. weight 55 lbs.

Hydraulic Swing Hoists

Features

- designed for easy operation
- provides excellent lifting performance
- easy maintenance
- puts you in complete control of load

Easy to Assemble and Operate

Hydraulic hoists can be easily transported and assembled. Handling loads up to 2000 pounds can be accomplished with ease and safety. Separate power and winch allows for easy handling of components. Power up and down and in and out puts the operator in complete control.

Features

Safety

- operator fence for operator safety
- swing boom allows load to be moved well away from roof edge
- hydraulically locked boom
- smooth up and down and in and out control

300# Hand Swing Hoist

- light weight and is easy to transport and assemble
- swing boom can be assembled to swing left or right
- self locking latch that locks and holds the boom in position during operation
- equipped with heavy duty oilimpregnated bronze bearings for smooth operation
- 300 lbs. capacity

"A" Frame Hand Hoist

- the most economical option for small job hoisting requirements
- light weight and easy to transport and set up
- · 300 lbs. capacity

Designed for moving roof top units and all heavy equpment on roofs, providing access to curb for roof repairs or re-roofing. Easy to use hand crank adjustable jacks. Lifts units weighing up to 2,000 lbs. 15" high. Sold two per set.

- Slide under A/C unit and raise 15".
- The interlocking system has a range up to 6 ft without extensions, and up to 10 ft. with extensions.

- The large 6"x8" base on the jacks provide stability and protect the roof.
- Sold 2 per set. (4 jacks with 2 extension bars are standard).

THROW IT OUT 79

Trash Removal System

A fast, safe and dust-free way to remove debris, old roofing, sweepings, etc., from the roof or other elevated levels.

Easy to set up, take down, store and transport.

Quickly pays for itself in man-hour savings.

Welded steel hopper stands up to punishment and provides 40-3/4" x 38" depository (weighs 160 lbs).

Trash Chutes

Tough 4-foot chute sections are not affected by sunlight, moisture or chemical corrosion (weight: 27 lbs each).

Trash Hopper Counterweight System

- comes complete with operator safety fence
- easy to set up; provides a safe holding system for trash hopper and chutes
- comes complete with counterweights
- hopper and trash chute sections are not included and are sold separately

CALGARY, AB (403) **255-8236** EDMONTON, AB (780) 432-2786

WINNIPEG, MB (204) 338-7613

80 ON DECK MOTORIZED

Roof Sweeper

Has a convenient 3-position control for brush angles that is spring-loaded with gates for positive positioning of brush from straight to right or left.

Floating power brush design assures positive bristle contact with all surfaces for more efficient cleaning and longer brush life. Interlinked power controls automatically disengage whenever the operator's hands are removed from the handle.

Low Profile Roof Cutter

- light weight and equipped with 5.5 HP Honda engine
- ideal for cutting jobs around tight and hard to reach areas such as air conditioners and vents
- · makes close cuts to skylights, parapets, etc.
- 12 inch blade with two carbide tipped cutters for longer blade life

- heavy duty construction pays special attention to detail, performance, reliability and minimum maintenance
- designed with pillow blocked bearings for longer machine life
- special benefits include a blade with two carbide-cutting tips for more cutting between changes and an adjustable cutting depth control handle
- available with either 8 HP Briggs & Stratton IC (industrial/commercial) engine or Honda 9 HP, 11 HP or 13 HP overhead valve engine

Double Cutter

- double blade version of our single cutter, available in Honda
- 11 HP and 13 HP

SPAR-Marathon • www.sparmarathon.ca

14" Rotary Planer

- heavy duty design with 11 HP overhead valve Honda engine
- · adjustable cutting depth
- equipped with heavy duty flanged block bearings for longer machine life
- cuts 14 inch path with 4 carbide tipped cutters mounted on solid steel circular plate
- cuts close to walls, gravel stops, roof edges, etc.
- safety stone guards for operator protection

GP5 Patch Planer

- heavy duty design with 5.5 HP Honda overhead valve engine
- cuts 4-1/2 inch path with 8 carbide tipped pins on 4 inch diameter solid steel drum
- easy access to drum assembly for maintenance through the safety cover
- · adjustable cutting depth
- ideal for repair work around gravel stops, expansion joints and flashing
- · drum rotation provides self-propulsion
- safety stone guards for operator protection

GP15 Planer

- heavy duty design with 9 HP Honda engine
- cuts 15 inch path with 30 carbide tipped pins on 4 inch diameter solid steel drum
- drum rotation provides self-propulsion
- adjustable cutting depth
- easy access to drum assembly for maintenance through the top service door
- safety stone guards for operator protection

82 **ON DECK MOTORIZED**

Hvdraulic Roof Peeler

- Heavy duty design with 11 H.P. electric start Honda engine
- Fully hydraulic, each wheel is driven by a separate motor and the blade is actuated by third motor
- Each wheel is controlled individually, which allows the machine to move forward, reverse and turn
- Oscillating and adjustable blade, ready to tear off any type of roof
- Easy grip, large lug tires
- Easy blade changes
- Hinged cover allows for easy access to all components for maintenance.

Power Graveler with Gravel Bucket Attachment

This versatile machine is designed to accept different attachments such as a gravel bucket (pictured), dumper tray or 55 gal. hot tank.

Equipped with high flotation tires on a wide wheel base and powered by a 5.5 HP Honda engine.

The wheels and gears are direct chain drive equipped with a brake.

Brake automatically engages for safety whenever the operator's hand leaves the control.

Power Graveler with no attachments

Chariot Cart

This ride-on attachment prevents operator fatigue and allows for guicker production.

Dumper Trav Attachment

Designed for hauling and unloading debris. Power graveler attachments can easily be changed over in minutes.

OAKVILLE, ON

LONDON, ON

HAMILTON, ON

BARRIE. ON (905) 825-0034 (519) 668-3626 (905) 560-2858 (705) 792-6683

Reduce operator fatigue with the ergonomically designed steering bar.

Power Graveler with dumper tray attachment.

Wheels Under Power Graveler with dumper tray attachment.

Hydraulic Power Graveler

Hydraulic power graveler maximizes productivity while keeping workers safer. Smoother operating with 9 Hp Engine.

- 9 Hp Honda engine
- Tool-Free installation of attachments
- Hydraulic controls
- Easy operation latch for dump bin
- Safer Operation: Operators keep their hands on the steering bar. Reduce fatigue with enhanced ergonomic steering bar
- Increased Flexibility: Work more efficiently with a variety of quick change attachment
- Durability: Years of reliable service with the rugged tube frame design

Wheels Under Power Graveler

Inset Wheel design prevents the machine from running over the previously laid rock and hot asphalt.

This power graveler is a compact design and is equipped with a 5.5 HP Honda engine.

The wheels and gears are direct chain drive equipped with a brake.

Brake automatically engages for safety whenever the operator's hand leaves the control.

It has an independent brake and clutch mechanism that can be easily adjusted.

Power graveler attachments can easily be changed over in minutes.

Attachment Options:

- Dump tray
- 55 Gallon hot tank
- · Gravel bucket

The name SPAR-Marathon is synonymous with top performance roofing kettles:

- minimal maintenance and easy servicing
- fast, accurate heating
- safer, more efficient operation
- heavy duty quality construction

Benefits

Easy Loading - the low profile makes loading simple and fast

Maximum Productivity - the complete insulation, unique circulating pump and other features ensure efficient, continuous operation.

Temperature Accuracy - stem-type thermometer helps determine and maintain optimum temperature.

Fast Heating - the SPAR-Marathon heating design speeds heating so jobs can start sooner. SPAR-Marathon kettles do what you need them to do best... achieve operating temperature guickly and holds it accurately. The unique recirculating system, the burners, insulation and other SPAR-Marathon design features are why even our smaller models can heat most asphalt to 500°F in under 30 minutes.

Better Towing - the rugged, wide-track frame and low profile make towing easier and safer.

Safer Operation - special splash guards help prevent accidents and costly delays - the key to profitable operation is efficient production with minimal delay. SPAR-Marathon kettle pumps, splash guards, brakes, drain-cocks, jacklegs, etc., are designed and manufactured for maximum performance, safety and roofer's profit.

Ideal Asphalt Consistency - SPAR-Marathon's special recirculating system maintains proper consistency throughout the job. Tube coking and sludge formations are reduced.

Constant, Even Heat - cold spots are minimized by the constant circulation of the asphalt.

Faster. Easier Maintenance - access to all parts requiring regular service is simple, with some parts being easily removed to speed maintenance. SPAR-Marathon has applied its on-the-iob roofing experience to innovate, design and modify its kettle equipment to a point where maintenance and service downtimes are minimal. All parts of SPAR-Marathon Roofing Kettles which require regular maintenance are readily accessible. Servicing may also be accomplished without difficulty.

Standard Features:

Recirculating System – SPAR-Marathon's unique system for recirculating asphalt maintains ideal consistency and temperatures throughout the operation (available on all models except the MK 180 and MK 90 Skid Kettle).

- all asphalt achieves designated temperature faster
- constant circulation of asphalt reduces sludge formations and tube coking
- even, constant heat minimizes "cold spots"
- recirculating valve an efficient, non-clog valve supplied with all models 250 gallons or greater

KK124 Pump – MPK models supplied with KK124 pump (plus 2' line and 9 HP Honda engine) with a potential to pump 57 U.S. apm to 150-200 ft. height. Consult with SPAR-Marathon for all uses above 60 feet

Insulated Vat – fully insulated vat (fibreglass 575°F) prevents unsafe and costly heat loss.

Nvlon Coupling – nvlon coupling between the pump and the engine reduces problems caused by expansion or other movements of these components.

Stem-type Thermometer - helps you to determine optimal application temperature for asphalt.

Electric Brakes – standard for models 250 gallons and greater: 12" x 2" electric brake.

Lighting Devices – lights and reflectors are supplied for road use

Splash Guards – inside the vat and lids help prevent accidental asphalt splash.

Engine Cover – a protective engine cover, which can be locked, is standard on all models.

Heavy Duty Immersion Unit - engineered and insulated for efficient heating, the entire unit may be easily removed for cleaning.

Insulated Flue Stacks - keeps flues from overheating and helps prevent flash fires.

Heavy Duty Tube Units – to maintain maximum temperature without buckling.

Heavy Duty Draincock – 2-1/2" diameter for faster pouring. Design provides instant opening and closing.

Optional Features:

Safety Loader – as pictured on our emissions control kettle. Great for preventing burns or splashes.

Optional Features: Tool Box

Lockable heavy duty all steel construction

Ladder Racks

For transporting ladders or thin walled tubing

Lid Options

Single Lid (Load from one side only)

Prevents burn and splash accidents as operator opens lid from reverse side.

MK 180 Single Lid Optional

For repairs and smaller less-mechanized crews. • 180 gal capacity (680 L) • single propane burner • 43-1/2" loading height

SPAR-Marathon

Dual Lid Standard

For semi-mechanized crews requiring a capacity of about 19 kegs of asphalt. • 250 gal capacity (945 L) • single propane burner • 42-1/2" loading height • recirculating system • electric brakes

Dual Lid (Load from both sides)

Facilitates easy loading from either side.

Regular Lid Standard

www.sparmarathon.ca

MPK 250 Single Lid Optional

MPK 350 Single Lid Optional

Dual Lid Standard

For a highly mechanized crew using a hot tanker. This popular pumper kettle features:

- 350 gal (1323 L) capacity double propane burners 42-1/2" loading height
- · recirculating system · electric brakes

MPK 500 Single Lid Optional

Dual Lid Standard

For highly mechanized crews. This production pumper model is especially suited for use with cold asphalt kegs, heating a full vat to 400°F in under 60 minutes.

- 500 gal (1890 L)capacity double propane burners 43-1/2" loading height
- · recirculating system · electric brakes · tandem axles

MPK 800 Dual Lid Standard

For very high production crews, this unit provides an extremely large capacity, without sacrificing heating efficiency.

- 793 gal (3000 L) capacity
- double propane burners
- recirculating system
- electric brakes
- tandem axles
- · also available in single lid option

CALGARY, AB (403) **255-8236** EDMONTON, AB (780) 432-2786 WINNIPEG, MB (204) **338-7613**

55-gal Patch Kettle with Wheels

An excellent patch pot with large wheels and wide frame providing excellent stabilization; wellbalanced for easy movement around job site. The SPAR-Marathon 55-gal tank has the flexibility to be used alone or carried by the utility carrier or station wagon, attached by the rod holes through body. Complete with burner, draincock, and thermometer.

The 55-gallon Patch Kettle, the 55-gallon Insulated Tank and the 55-gallon Insulated Patch Pot may be used with either the utility carrier or the stationwagon carrier. Channel irons securely attach the tank on either carrier.

MK 90 Skid Kettle

- 90 gal. capacity
- heats up quickly
- can be easily hoisted to the roof and fits in most elevators
- very easy to handle and maneuver
- bottom rails make for easy sleigh-like push/pull moving

Economy Patch Kettle

- 40 gal. capacity
- · heats up quickly and easily
- for tie ins, small patch jobs and maintenance

55-gal Insulated Patch Pot

For the roofer requiring access to hot asphalt maintained at constant application temperature while on deck. Actually, a completely installed mini kettle that easily attaches to your carrier for time-consuming detail work (such as drains or skylights). Comes complete with vapour torch, hose, regulator, drain cock and thermometer. (Tank only, does not include utility carrier.)

SPAR-Marathon • www.sparmarathon.ca

Emissions Control Kettle

Efficient and Effective at Controlling Emissions and Odour

- Use wherever asphalt fumes can affect your customer or your surroundings.
- Impressive control of smoke and smell means no more complaints.

Easy to Operate and Cost Efficient

By turning on the vapour propane burner in the chimney stack asphalt emissions are efficiently burned away – it's that simple. (For complete operating instructions please contact our office or refer to your owner's manual.)

Standard Features

Our emissions control kettle is loaded with the same standard features and benefits as our regular kettles. Our refinements and improvements are the result of almost 50 years of building high quality kettles. Emissions control is available on any size SPAR-Marathon kettle. Also available as a retro-fit lid to fit on your existing SPAR-Marathon kettle.

Safety Features

Fire Arrester Screens – Provides protection in the event of a flame backdraft and also protects the chimney burner area from asphalt splashes.

Offset Chimney Design – Provides extra safety. The burner flame is not directly over the kettle opening and is safer than other designs.

- Use for jobs at: schools, apartment buildings and other residential areas, shopping centres, hospitals, office buildings, food processing plants, etc.
- Work any job during normal business hours.

Safety Loader – Loading is done through the safety loader which prevents operator burns and splashes and helps prevent smoke and odour from escaping (shown below).

Automatic Temperature Controls – Your choice of fully automatic or semi automatic hi-lo provides maximum control and safety by maintaining asphalt at a consistent temperature.

Kettle Accessories

Draincock Heavy duty 2-1/2" diameter for faster pouring

Miscellaneous Fittings Unions, Safety Flow Valves, Etc.

Thermometers 4" regular, 12" with easy test handle

Regulators & Gauges ULC Approved. Suitable for vapour or liquid withdrawal

Hoses ULC Approved. Variety of sizes for vapour or liquid systems

PICKERING, ON

Flex Saver Pipe Saves wear and tear on Flex Pipe

Bends by hand to desired angle. Available in 1-1/2" and 2" diameters in 3 foot and 5 foot lengths

Pump Coupling Cover

This new safety feature prevents worker's hands, arms and other body parts or clothing from making contact with rotating parts eliminating possible hazards. Can also be ordered as an easy to install part for your in-use kettle.

Thin-walled Tubing

Available in 1-1/2" and 2" diameters: in 4. 6, 10 and 20 foot lengths

Hot Tar Hose

- . heat resistant rubber flex hose
- 1-1/2" complete with nipple on one end

Burner ULC Approved for any size kettle

4000 Utility Carrier

Roof Carriers

SPAR-Marathon Roof Carriers are an effective method of transporting materials on any flat surface. Rugged, oversize steel frame construction provides reliable movement of bulky items. Large pneumatic tires make a big load move easier. Convenient trailer hookups are standard for more mechanized crews.

Single Ply Roll Carrier

- make easy work of unrolling single ply or moving rolls around jobsite
- consists of two double wheeled handles and one 13' stabilizing tube
- the stabilizing tube's rotating feature permits easy, controlled unrolling and the double wheeled handles allow for easy maneuverability of even the biggest rolls

Stationwagon Carrier

The Stationwagon Carrier comes with large balloon tires for extra stability as pictured.

SPAR-Marathon • www.sparmarathon.ca

SPREAD IT AROUND

55-gal Insulated Tank

This hot stuff tank is your most economical method for fast, safe transport of asphalt across any roof deck. Complete insulation wrap maintains asphalt at correct application temperature. Quick change channel irons securely supports this tank to our utility or station wagon carriers. Also available with optional thermometer. (Tank only, does not include station wagon carrier.)

Model 3000 Upright Carrier

An alternative to carriers with tank options, the SPAR-Marathon Model 3000 Insulated Carrier for hot asphalt allows safer transport. Simply fill up and hoist to the roof. The most profitable method of moving asphalt up any size of building. Also available with optional thermometer.

Gravel Spreader

The SPAR-Marathon Gravel Spreader will spread gravel evenly across 36" as quickly as an operator can walk.

One simple adjustment sets up gravel flow; one lever provides positive open and close feed control. Adapts to all contemporary graveling applications.

3 large wheels provide the ultimate in maneuverability and stability.

Tubeless pneumatic tires and semipneumatic tires make it easy to handle.

Capacity: 5-1/2 cubic feet.

94 SPREAD IT AROUND

Universal Adhesive Dispenser

Two variable feeds:

- single ribbons on 6" deck
- double ribbons on an 8" deck

Dual wheels that ride on ribs without falling into flutes (10" rubber tires, ball bearing wheels).

Mini Mopper

The SPAR-Marathon Mini Mopper reduces time spent hand mopping, top coating, and dispensing adhesives. The 1 metre (39-1/2") width and 28-gallon capacity ensures that the Mini Mopper will easily pay for itself quickly. Oilite bushings and tubeless pneumatic tires save your energy by increasing maneuverability. Mop at almost any speed, as hot stuff outlets are spaced 1-inch apart; plugs also provided to help regulate the width or volume of desired flow.

Also available in 48" version, by special order.

Mini Mopper with Centre Wheel Attachment

(shown in the mopping position).

EOUIPMENT 95

101 Bucket and Carrier

The SPAR-Marathon Model #101 Bucket and Carrier gently transports hot stuff to where you are mopping.

- ball bearing heavy duty rubber wheels or optional steel wheel version
- bucket detaches from handy tubular steel carrier
- carrier features mop handle support
- bucket capacity: 8 gallons

101 Bucket

25 Gallon Big Bucket

The Model #25 Big Bucket reduces the number of refills needed to finish the job, with its large 25-gallon capacity.

T-bar handle, tubeless pneumatic tires and oilite bushings all add up to time-saving maneuverability.

Dangerous flash fires are reduced by specially designed wind deflector shield.

Non Stick **Roof Buckets**

Both buckets are all steel. with round bottoms to prevent sticking to roof: features a 'D' type lower handle and a heavy ball type top handle that cannot fall against side. Available in 12" or 14" models

Galvanized **Bucket**

An economical

Pouring Pot

- for pouring asphalt
- comes complete with no-spill lid
- same strong construction as our non-stick roof bucket

No-Spill Bucket

- for hoisting or carrying asphalt
- prevents unwanted asphalt spills
- easy flip safety lid
- same strong construction as our non-stick roof bucket

Bucket Handle

- strengthens regular pails and buckets
- adjustable for different sizes
- reusable
- handle will not fall down and stick to bucket

www.sparmarathon.ca

alternative.

96 VARIOUS

Roof Hatch

- standard 30" x 36" size
- constructed from 16 + 14 gauge Steel
- plated inner & outer handles to withstand weather
- · primed with grey oxide primer
- · Fibreboard insulation on all sides

Roof Hatch Complete With 3" ISO Insulation

Our standard roof hatch complete with 3" ISO insulation (polyisocyanurate) on all 4 sides and lid.

Why insulate the whole roof and forget about the hatch? Standard roof hatches provide no insulation and you lose R-value on the roof. Any building owner would gladly pay this nominal upcharge.

Roof Hatch Safety Rail

Order it separate or pre-installed on the hatch. With safety being increasingly important, would any building owner say no? Upsell and add to your profit.

Water Pump

- · Honda powered
- 1-1/2" suction and 1-1/2" discharge ports for quick removal of water
- comes complete with 6' suction hose, 25' discharge hose and puddle plate

SPAR-Marathon

100 TOOLS & ACCESSORIES

Core Cutter

- · fast, efficient and easy to use
- makes a hole that can easily be patched
- teeth can be re-sharpened
- designed for durability with hardened steel

 incredible heavy duty all steel construction with quality oilite bronze bushings

2" Steel Roller - single fork roller holder allows for use right next to curbs. Slightly rounded roller edge eliminates cutting into roof membrane

2" Silicone Roller - when you need a softer touch for rolling. Single fork design with durable silicone rubber

4" Silicone Roller - single fork roller holder. For use on single ply tapes and seams

Granular Embedment Tool

- saves significant time over regular torch and trowel method
- embeds granulars for proper seaming on modified bitumen

Roll Hip Hugger for Mod Bit

The Hip Hugger and Hook Bar allow application of modified bitumen without walking on the membrane. Certain modified bitumen, such as S.B.S., should not be walked upon during installation.

Comfortably wraps around so that the strain of pulling the roll is on the legs, instead of the back. Can also be used to help control the roll in the sloped or vertical applications.

Roll Hook for Mod Bit

Convenient hook design allows for application without walking on the membrane. Angled grip area provides less wrist and arm fatigue.

102 TRAILERS

Hydraulic Dump Trailers

When we designed our line of hydraulic dump trailers we talked to the people that mattered - the professional roofing contractor. We found out what they liked and disliked about other models in the market. Our lineup hits the nail on the head in providing professionals what they are looking for.

Standard Features

Frame –	HSS tubing construction
Dump Body –	HSS tubing construction
Axles –	2 heavy duty axles
Hitch –	Height adjustable pintle ring or ball hitch to suit your towing truck.
Brakes –	All wheels are equipped with electric brakes
Lighting –	All lights are wired in compliance with CMVSS and NHTSA
Reflectors –	Reflectors and reflector tape installed with above compliances
Hydraulics –	Equipped with one way pump and quick return valve or an optional two way pump with remote dump control. Remote dump control is standard on HD models
Wheel Jack –	Equipped with jack on all models
Safety Chains –	Equipped with safety chains on all models
Lift Cylinder –	Heavy duty lift cylinder

Optional Features:

- rolling cover tarpaulin .
- remote dump control (standard on HD models)
- custom paint colour
- high side walls

Heavy gauge steel and extra cross supports provides ultra sturdy frame and dump body.

TR100 HD (regular size sides)

Planks slide in side holders to increase wall height

Specifications

Load Capacity:	10,000 lbs
Gross Vehicle weight: (GVW)	12,000 lbs.
Dump Body Size:	6 x 10 ft.
Dump Body Height:	40 in.
Axles:	2-6000 lbs.
Tires:	8-14.5 LT
Lifting Cylinder:	4-1/2 in.

104 SHEET METAL EQUIPMENT

SHEET METAL EQUIPMENT Lok-Former

An excellent hand tool for forming 'S' locks on sheet metal flashings. Made from heavy gauge steel for maximum bending support. Available in 12" and 18" versions.

Bandmaster Tool Mark II

Get 3 ton punching power in a Bandmaster Mark II metal working tool.

Four tools in one!

- the Bandmaster Mark II twists, punches, bends and shears heavy gauge band iron or steel hangers (up to 1/8" x 1-1/4")
- twists 90° for ductwork hangers
- punching pressure equals about 6000 lbs. using standard punches and dies 1/16" to 7/16"

- supplied with 9/32" punch and die
- bending is effortless with long handle
- shearing blades reversible for double cutting life

Make duct hangers right on the job!

The ultimate in portability, the Bandmaster Mark II weighs about 35 lbs. and measures approximately 36" x 6" x 3". Add a handy, twisting, punching, bending and shearing Bandmaster to your crew today.

SHEET METAL EQUIPMENT 105

48" Gang Slitter (Super Slitter)

Standard Features

This heavy duty 'pull through' type slitter was designed for use by roofers and sheet metal contractors.

- rugged frame for years of solid, accurate slitting
- gear and chain drive with safety guard
- precision ground, high carbon, high chrome tool steel knives as standard equipment (can be reground for extended life)
- three pairs of cutting knives supplied standard
- heavy gauge steel table for supporting sheets
- precision ground shafts mounted between flanged bearings
- sheet guide on both sides for safe and accurate slitting
- easily adjustable for light or heavy gauge

Specifications

- sheet capacity: 48" (1220 mm) wide
- shafts: 3" (76 mm) diameter
- cut capacities

Metal Gauge	Max. No. of Cuts	Metal Gauge	Max. No. of Cuts
30	6	20	2
28	4	18	1
26	3	16	1
24	3		

- cutting speed: 40 feet per minute (0.2 m/sec.)
- table height: 33-1/2" (850 mm)
- shipping weight: 550 lbs. (250 kg)

Calibrated Back Gauge

106 EQUIPMENT

Floor Model Plain Brakes

- long handles for extra leverage
- full capacity, 1" flange, bar and angle in place
- improved leg design for neat appearance and lighter weight.

Also available is a wide selection of Sheet Metal Equipment and manually-operated fabricating tools: Punches and Presses, Notchers, Benders, Shears, Formers, Beading, Crimping and Seaming Machines

Model U422 Universal Bench Brake

(4 ft, 22 gauge)

Weighs only 280 lbs, including skids. Two men can handle it easily, taking it out on the job or moving it to the most convenient spot in the shop to suit the job at hand.

SHEET METAL EQUIPMENT 107

Malco

Mini Brake Compact & Portable

Compact size makes the Mini Brake suitable for use virtually anywhere on the job site. Extra wide feet offer stability even when operating on a truck tailgate. 4 feet long.

Pan Style MINI-BRAKE

16 Precision ground, movable finger plates for straight bends, pans and boxes.

Create bending widths from 2 inches (50.8 mm) to 48 inches (1.2 m).

When forming pans and boxes, remove and reposition finger plates as needed to span widths.

Triac ST Accessories

MOISTURE METER FOR **ROOFING & WALLS** SYSTEMS

The Tramex RWS is a multi-mode non-invasive impedance moisture scanner designed for the instant. precise and non-destructive evaluation of moisture conditions and leak tracing in the roofing and walls systems of the building envelope.

Excess moisture can be hidden and trapped in the substrate and within the thickness of the wall or roof construction. If these conditions are allowed to continue the moisture will increase, eventually leading to rot and decay and possible failure of the system and the structure. Also wet insulation loses its thermal value, resulting in unnecessary heat loss or gain and thermal movement in the structure

PICKERING, ON

- For non-destructive moisture evaluation of roofs, EIFS, foam insulation systems & other building envelope applications.
- To evaluate the extent of the moisture problem and help trace and pin-point its source.
- Multi-mode functions allowing for depth penetration and sensitivity selection.
- Fast and easy to operate giving instant clear readings.
- "Hold" function facilitates ease of recording readings.
- Lightweight, handheld and battery operated.
- Inexpensive to purchase and operate compared to other non-destructive testing methods.

Aluminum Ladder Jack

- lightweight
- · easily adjustable
- will take up to 18" platform

SERVICE IS OUR SPECIALTY · SPAR-Marathon

Great for eavestrough, roof edge, downspout de-icing and for melting a path for water flow to roof drains.

Roof Cable Control

The easy-to-install automatic control connects to a roof and gutter cable. It automatically turns on the heating cable to prevent build-up of snow and ice. The electronic sensor in the gutter and on the roof detects both temperature and moisture. Together. these conditions can cause ice build-up on shingles, in gutters and downspouts, resulting in costly roof repair. Once plugged in, the device automatically switches the heating cable on or off as required. Operating costs are minimal and it helps save energy dollars. It is housed in a weather-resistant enclosure with a state-of-the-art electronic sensor. It has a capacity of 1200 watts, 10 Amps at 120 VAC.

SPAR-Marathon

SR-1 Hot Line Safety Rail System

Provides the ultimate safety at the hot line loading area and roof edge. Meets OSHA* requirements withstanding a force of 200 lbs. in any direction.

The kit consists of:

- 8' front section
- 5' side sections (2 required)
- ballast counterweights (6 required)
- connecting rods (2 required)

Available option:

hot pipe holding bracket

The bottom cross sections (toe boards) are welded steel and do not require additional wood as a bottom cross section.

SR-2 Safety Rail System

Unlimited applications wherever a sturdy portable safety rail is needed. Allows work to be done next to the roof edge. Can also be used as a hot line safety rail or around hoisting equipment. Meets OSHA* requirements withstanding a force of 200 lbs. in any direction.

Sold individually:

- 10' safety rail 5' safety rail

PICKERING, ON

- 8' safety rail
- base plate with 4 pins
- base plate mover dolly
- 2 x 6 wood cross section (toe board)

WESTON RD (WESTON)

SPAR-Marathon Perimeter Warning Line System

Acts as a visual warning for hazard areas etc. Meets OSHA* requirements. The stanchion easily slips out from the weighted base plate for easy transportation and storage.

Sold individually:

- base plate and stanchion
- 100' of flags

Four base plates and stanchions are recommended for 100' of flags.

Folding Perimeter Warning Line System

This folding option is completely self contained with no removable parts. Folds together easily into a very compact unit for carrying and storage. Each stand is sold separately. Four stands are recommended for every 100' of flags.

*Current OSHA at time of printing. For OSHA regulations please call OSHA or our office.

PROTECTIVE ROOFING SAFETY PRODUCTS

PR 100 Guardrail System

The PR 100 Guardrail System is an efficient and practical perimeter guardrail that allows you to work right to the edge of the roof.

- PR 100 meets and exceeds OSHA & WCB requirements
- · Accommodates: parapets and cant strips
- Provides unobstructed access to roof edge for people and equipment
- · PR 100 are easy to install
- · Standard 2"x4" wood is added for rails
- The system does not have to be dismantled to install flashing or coping

The PR 100 Guardrail System is comprised of a stanchion and either a compression bracket, a wall mount bracket or a nailer bracket are available for different roof applications.

CALGARY, AB (403) **255-8236** EDMONTON, AB (780) 432-2786 WINNIPEG, MB (204) 338-7613

PROTECTIVE ROOFING SAFETY PRODUCTS

PR 600 Mobile Fall Protection System For Flat Roofs

The PR 600 is a Fall Arrest Anchoring System designed for use on flat roofs. The PR 600 clamps onto our specially designed roof cart. The PR 600 can be moved along the roof by pulling the cart to the desired working location. Then adjust the ballast weight, which sets the system in place, providing a fall safe working area. The PR 600 meets 0.S.H.A. compliance 1926.502D.

The PR 600 mobile provides fall protection for up to 3 people, with 2 for fall arrest and 1 for fall restraint. Lightweight design makes the system easier to lift over ducts and piping that may lay over roof's work surface. The component parts can even be taken up to the roof in an elevator. The system is easy to assemble and dismantle.

Uses

- · Removing or installing coping
- Tear off and installation of leading edge
- Removal & replacement of in-field roof deck
- Installing or dismantling edge guardrail systems
- · Working around roof openings
- Removing or installing covers or skylights
- Snow removal

If a worker falls over the edge, pivot points dig into roof and ballast weight resists the overturning moment, arresting the worker's fall.

SPAR-Marathon

SIKO PERFORMANCE

Dynasty[®] with ArmourZone[®]

Performance Shingles

GET IN THE ARMOURZONE

There are three excellent and profitable reasons why you should "get in the ArmourZone" with IKO Dynasty for your next roof replacement or remodelling project: Peace-of-mind for your prospect, ease of installation for your crew and upsell opportunities for you.

Nordic[™] with ArmourZone®

Performance Shingles

DESIGNED TO MAKE AND TAKE AN IMPACT

Extreme weather calls for extreme weather protection. Nordic's unique combination of superior wind and impact resistant features make it one of the top-performing asphalt shingles on the market.

¹See Limited Warranty for complete terms, conditions, restrictions, and application requirements. ²High Wind Application is required.

SPAR-Marathon

www.sparmarathon.ca

 The tear-resistant, reinforced woven band provides fastening strength over a greater surface area of the shingle, helping to prevent nail heads from pulling through the shingle in high winds.

- IKO's "Advantage" sized shingles
 3 bundles = 100 sq. ft.
- > Algae-resistant granules.
- 15 year IKO Iron Clad Protection¹
- Limited Lifetime Warranty¹

- Limited Wind Warranty of up to 130 mph (210 km/h)¹ with the use of only four (4) nails.
- High definition colour blends.
- Engineered to provide superior protection against wind-uplift and water infiltration. IKO Nordic's polymer-modified asphalt coating acts like a shock absorber, qualifying the shingle for a Class 4 impact resistance rating.*

HERE'S WHAT ELEVATES THE PERFORMANCE OF NORDIC AND DYNASTY SHINGLES.

Performance Begins at the Core.

IKO Performance Shingles offer superior protection against wind uplift and water infiltration. Performance-class shingles are among the industry's heaviest thanks to a durable fiberglass mat covered with a thick coat of asphalt. Granule Coverage and Adhesion. We quarry, crush and colorize our granules to exact specifications. The granules' main purposes are to protect the underlying asphalt against damage from the sun's harmful rays and to help inhibit the natural weathering process. Our exclusive, advanced colour-blending technology creates beautiful, high-definition colour blends you'll love to see on your home.

Nail-Holding Power.

Our Performance shingles are reinforced with IKOs "ArmourZone". The 11/4-inch wide nailing surface for correct nail placement, with a tear-resistant, woven band on the back, provides even more fastening strength over a wider surface. Nails applied in this area are optimally positioned to help resist nail pull-through and shingle blow-off, even in high-wind conditions.

Laminate Adhesive. Five strips of our tough, construction-grade adhesive are used to laminate the shim to the tooth.

Effective Sealing.

IKO's proprietary FastLock* sealant is among the industry's best for resisting wind uplift in hot or cold weather. This means the shingles will stick and stay stuck where they're laid, for effective protection against water infiltration caused by wind-driven rain or ice dams.

Built-in Algae

Resistance. Colorfast algae-resistant granules help inhibit the growth of blue-green algae, which can cause unsightly black streaks, stains or discoloration.

¹See Limited Warranty for complete terms, conditions, restrictions, and application requirements. *This is not a guarantee of impact resistance against hail. Damage from hail is not covered under the limited warranty. See full details.

Shingles are your home's first line of defense, but they protect, perform and look their best installed with the recommended IKO Proformax Integrated Roofing Accessories.

1. Deck Protection

IKO GoldSeam[™] Roof Sealing Tape 1a. Apply where the fascia and eaves meet. 1b. Apply over seams when sealing the deck using synthetic underlayment.

ArmourGard or StormShield Ice & Water

1c. Apply under shingled roofs to prevent water infiltration due to ice dams and wind-driven rain.

Synthetic Underlayment

Stormtite or RoofGard-Cool Grey™

Both are light and easy to handle, making it faster to install. The synthetic, nonbreathable material is easy to install around vents, dormers, and other roof structures. And since it's grey instead of black, it absorbs less of the sun's radiant heat.

3. Roof Starters

Leading Edge Plus™ or EdgeSeal™

Apply starter shingles with IKO's own high-strength thermally activated sealant or use the double-sided starter roll at eaves and rakes to help ensure wind resistance at that critical first course of shingles.

4. Capping Shingles

Hip & Ridge Plus or High profile Ultra HP/UltraHP IR

Our specially constructed ridge cap shingles are designed to provide a high-quality alternative to using cut-up roof shingles to protect this important area. The "HP" stands for "High Profile," which means that they're also designed to add dimension, depth and texture to your roofline and rakes.

Beauty and performance. Who says you can't have it all?

Shingles are the first line of defense against the elements, but they could use some extra help. Choose INTEGRA Integrated Roofing Components to go with them.

1a.1b.1c. 1d. UNDERLYING OUALITY

Effectively seal gaps on roof deck and between fascia and roof deck with IKO GoldSeam roof sealing tape (1a,1b). Protect your roof deck with high-quality StormShield® Ice & Water Protector and help the eaves fend off water infiltration caused by ice dams or wind-driven rain (1c). Use the innovative RoofGard-Cool Grev or Stormtite synthetic underlayment for total deck protection (1d).

2. LEADING EDGE PERFORMANCE

Leading Edge Plus starter strips and EdgeSeal starter roll are designed to save installers time. Their purpose is to create a sealed edge to prevent water infiltration due to wind uplift

3. STUNNING BEAUTY

Capping shingles protect the roof's vulnerable areas and create a breathtaking roofline, too. Choose pre-cut CRC Hip & Ridge Plus cap products or UltraHP/UltraHP IR highprofile capping shingles for the perfect finishing detail.

WinterGuard™

WinterGuard[™] is designed for use on roof decks as a waterproofing underlayment beneath shingle, slate, tile, or metal roofs to prevent leakage due to water back-up from ice dams or wind driven rain. It is most commonly used in critical areas such as roof eaves, valleys and low slope applications.

WinterGuard is classified by UL to be a suitable underlayment for use in any UL Class A, B, or C fire rated shingle system and is manufactured to meet ASTM A1970.

Problem:

When snow and ice melt. trapped water can infiltrate to damage the roof deck and building interior

Solution:

WinterGuard is installed under shinaled roofina to prevent water damage from ice dams as well as wind driven rain

MetaLayment^{**}

Waterproofing Underlayment

When it comes to applying a metal, shingle, slate or mechanically-fastened tile roof, you need an underlayment that will increase the protection of your investment. It is waterproof, does not rip and seals around nails driven through it.

DiamondDeck[®]

Features/Benefits

- Excellent 6-month UV stability: Finish roof when you are ready
- Excellent tear resistance: Durability, reduced puncture risk
- Superior wet/dry traction: Work faster & safer

Product Specifications

 Roll Size: 10 squares (48" wide x 250' long)

RoofRunner™

Lightweight synthetic polymer-based underlayment outperforms felt. Designed for use on roof decks as a water-resistant layer beneath asphalt roofing shingles. 4' x 250'.

High-Performance

Starter

Starter Course shingle specifically for use with Grand Manor and Hatteras - and the only approved installation alternative to using the shingles themselves.

- 10"x36", 102 lineal ft. per bundle, 34 shingles per bundle
- Provides labour and cost savings by not cutting shingles
- Dual sealant strip for increased wind resistance
- Better look with straight factory-cut eave edge

Presidential Starter

Required for Presidential Shake TL and Presidential Shake applications.

- 13-1/4"x40" (required double layer), 36.5 lineal ft. per bundle (based on 2-layer application), 22 shingles per bundle
- Two layers of straight factory-cut eave edge
- Available in the entire Presidential Shake TL and Presidential Shake colour line
- Assures Class A fire rating
- · Saves significant installation time

CertainTeed Swiftstart

CertainTeed Swiftstart metric starter shingle is designed specifically for use with CertainTeed Landmark Series shingles. Rather than cutting expensive field shingles to use as starters, you can save time and money by starting with Swiftstart.

- Code-compliant, meets min. 2" headlap requirement for metric shingles; many competing products do not
- Each 18-piece bundle covers 116 linear ft.
- Recommended for use to obtain enhanced warranties

Shangle Ridge Accessory

 Hip and ridge for Grand Manor, Carriage House, Centennial Slate and Highland Slate; 10 lineal ft. per bundle; 15 shingles per bundle

Shadow Ridge

 Hip and ridge for Presidential TL, Presidential, Landmark TL, Landmark Series and Independence; 30 lineal ft. per bundle; 24 shingles per bundle

Solaris Hip and Ridge

- Used for hip and ridge capping
- Matches Landmark Solaris shingle colours
- Covers 33.75 lineal feet per bundle; 24 shingles per bundle

Cedar Crest

 Hip and ridge for Landmark Series, Landmark TL, Presidential Shake, Presidential Shake TL, Highland Slate and Hatteras; 20 lineal ft. per bundle

12" NorthGate* Accessory

178 SLATE & SHAKE

Natural Slate & Cedar Shake

DaVinci offffers the beauty of natural slate and cedar shake in diffferent tile options, giving you the ability to meet your aesthetic vision as well as respect your budget.

Multi-Width

Laying tiles of multiple widths in a straight or staggered pattern creates the most natural, non-repeating appearance possible.

Single-Width

Single-width tiles add a budgetfriendly touch of tradition to your home in either a straight or staggered pattern. The uniform tile size reduces waste and speeds up installation.

Bellaforté

Its innovative design requires less overlap (reducing waste and cost), making it a stylish upgrade that won't bust the budget.

CALGARY, AB (403) **255-8236** EDMONTON, AB (780) 432-2786 WINNIPEG, MB (204) **338-7613**

Wakefield Bridge steel shingles are designed as an alternative to common asphalt shingles, but with the toughness and long-lasting qualities of high-strength steel roofing panels. With our limited 50-year warranty, these new steel shingles may very well be the last roof you install on your house for as long as you live.

Monteciano Mediterranean-Style Steel Roofing Tiles

Ideal Roofing's new Mediterranean-style Monteciano[™] steel roofing tile is designed to replicate the traditional clay or terra cotta roofing tiles with their typical warm and rich

red earth tones, combining their unique character, distinguished look and elegance with the durability of high-strength steel roofing.

Grace Ice & Water Shield[®] – Self adhered roofing underlayment for premium roof leak protection.

Coverage: 200sq. ft (18.6 sq. m)

Grace Ice & Water Shield[®] **HT** – Self adhered roofing underlayment for high temperature applications, up to 240°F. *Coverage: 200 sg. ft (18.6 sg. m)*

Grace Select – Self adhered roofing underlayment for general roof leak protection.

Coverage: 195 sq. ft (18.1 sq. m)

Grace Roof Detail Membrane – Self adhered flexible flashing for roof detail areas.

Roll Length: 50 ft. (15.2 m) Roll width: 18 in (457 mm) Roll Length: 50 ft. (15.2 m) Roll width: 9 in (229 mm)

Grace Vycor® Aluminum Flashing – Self adhered aluminum flashing.

Roll length: 50 ft (22.9 m) Roll width: 4 in. (100 mm) Roll length: 50 ft (22.9 m) Roll width: 6 in. (150 mm)

TRI-FLEX® 15 Synthetic Underlayment – Synthetic performance alternative to #15 felt. Acts as a secondary watershedding material below mechanically attached roof coverings. Also available in Tri-Flex XT for extra high performance.

Coverage: 10 sq. ft rolls (48"x 250')

Breathable Synthetic Roof Underlayment

Why you should use a breathable synthetic.

When moisture is trapped within the roof, black mold and fungal growth are allowed to develop. Unseen from the outside, mold and moisture weaken the structural integrity of the roof system.

Sahara

WATERPROOFING MEMBRANES

WEATHERTEX®

Superior grip sand finish. A waterproof membrane designed to protect the roofs. It is self-adhesive and built with a glass mat frame and modified asphalt.

- Multiple use convenience: roofing and re-roofing, on eaves, in valleys, along ridges, at roof perimeters and joint flashings, around chimneys and skylights
- Ideal under asphalt shingles, wood shakes and slate roof assemblies
- Advanced flexibility and pliability even in cold weather for ease of angling and cornering
- Roll dimensions: 914 mm x 19.8 m (3 ft x 65 ft)
- Coverage per roll: 16.6 m² (178.8 ft²)

WEATHERTEX®

SPAR-Marathon

UNDERLAYMENT

PRODECK

Constructed with high-strength woven polypropylene and coated on both sides, this membrane has a high resistance to tear and can be left exposed for up to 6 months.

- · Waterproof, high-performance synthetic polymer
- · Our lightest weight underlayment yet for even easier handling
- Lined every 50 mm (2") to help line shinales
- Boll dimensions: 1219 mm x 76.2 m (4 ft x 250 ft)
- Coverage per roll: 92.9 m² (1000 ft²)

BP PRODECK

SURFDFCK

The membrane is made with a nonwoven polypropylene top laminated to a woven polypropylene base coated on both sides.

- 50 mm (2") line markings help guide the horizontal alignment of the shingles and are great labour saving features as well
- · Ideal under asphalt shingles, wood shakes and slate roof assemblies
- · Light to handle, makes installation fast and easy
- Roll dimensions: 1219 mm x 76.2 m (4 ft x 250 ft)
- Coverage per roll: 92.9 m² (1000 ft²)

ASPHALT FELT NO. 15 PERFORATED CSA

This product can be used on built-up roofing systems.

- · Uniform flexible felt of organic fibres
- · Impregnated with asphalt saturant
- · Over 1200 holes per square meter
- Line markings on the top surface at 50 mm (2"), 216 mm (8 1/2"). 287 mm (11 5/8"), 432 mm (17"), from each side of the sheet
- Roll dimensions: 914 mm x 43.8 m (3 ft x 144 ft)
- Coverage per roll: 40 m² (432 ft²)

Eaveguard®

Self-Adhering Shingle Underlayment

Prevent

Eaveguard[®] protects your home against ice and water damage.

Shingle

Self-adhesive split-back release film. Just peel and stick.

Why should you use Eaveguard®?

Eaveguard[®] is a rubberized sheet that protects where shingles don't.

During the winter, ice and snow accumulates in vulnerable areas on your roof. As temperatures warm up, ice dams can cause the water from thawing ice and snow to back up under the shingles and leak into your home! Also, wind-driven rain can be blown under the shingles, again causing leaks and interior damage!

Eaveguard® provides a waterproof shield between the shingles and the roof deck in vulnerable areas such as: skylights, vent stacks, valleys, eaves, ridges, hips, low slope and dormer areas.

Eaveguard[®] is available in the following roll sizes: 36" x 65' and 44" x 61'.

INTEGRATED ROOFING ACCESSORIES

Hip & Ridge Plus[™]

Ridge Cap Shingles

A QUICK, EASY AND ATTRACTIVE WAY TO PROTECT THE VULNERABLE HIP AND RIDGE AREAS OF THE ROOF.

Lightweight and perforated to give you three equal pieces. By spending less time cutting, you'll save on labour costs. Now you can improve the roofline and your bottom line!

- Easy to separate, even at the site of application!
- IKO-SBS modified adhesive sealant for maximum wind protection. Features an algae resistant granule.
- May be applied in a traditional "single" dimensional thickness and appearance.
 To add dimensional depth, simply apply in two layers, the top layer set back about 19 mm (3/4").

 Available in colours that match our most popular Cambridge, Royal Estate, Dynasty, Armourshake and Crowne Slate shingles!

Prior to application in cold weather, storing the shingles in a heated area will allow for easier bending.

Specifications									
Length	1 m (39-3/8″)

IKO UltraHP[®] IR

Ridge Cap Shingles

BEAUTIFUL PROTECTION AGAINST THE ELEMENTS – AND EASY TO INSTALL, TOO!

These specially constructed ridge cap shingles are designed to provide a high-quality alternative to using cut-up roof shingles to protect this important area. The "HP" stands for "Hight Profile", which means that they're also designed to add dimension, depth and texture to your roofline and rakes.

 Pre-formed rolled design features a curved edge and has an 8-1/4" exposure
 no need to cut or fold on the roof

Take quality to another dimension on your next roofing project!

INTEGRATED ROOFING ACCESSORIES

Stormtite®

Synthetic Underlayment

SYNTHETIC UNDERLAYMENT THAT WILL TOTALLY ROCK THE WAY YOU ROLL

IKO Stormtite synthetic underlayment is engineered to be used under asphalt shingles. It is a cost-effective alternative to traditional #15 asphalt saturated felt, and is covered by a limited 15-year material warranty¹.

Here's why it rocks.

- Slip-resistant surface coated top and bottom with tough polyolefin.
- Lighter to work with. A 1000 square foot roll weighs only 21.5 lb.
- Faster and easier to install. It lays flat without curling.
- Great performance.

Specifications

Length	76.2 m (250 ft)				
Width	122m (4')				
Roll Contents	92.9 m² (1000 sq. ft.)				
Rolls per pallet 56					
Note: All values shown are approximate.					

Leading Edge Plus™

Roof Starters

Leading Edge Plus

Fast, easy and very convenient to apply. They can be used with any manufacturer's asphalt shingle. Each Leading Edge Plus starter strip "shingle" is perforated right down the middle for two starter strips out of each shingle! The aggressive sealant strip along their bottom edge creates a tight seal to protect shingle ends against wind damage and reduce shingle blow-offs.

EdgeSeal[®]

- Apply at eaves and rakes
- Double-sided, extra-tacky adhesive creates a super strong bond to seal the drip-edge below to the shingle above
- No tools or fasteners required. Just peel off the no-stick release film and adhere directly

to a recommended IKO ice and water protector and/or drip-edge. then roll or simply press into position.

Specifications	Leading Edge Plus	EdgeSeal			
Length	1038 mm (40-7/8″)	20.5 m (67.3")			
Width	200 mm (7-7/8″)	222 mm (8.75")

Ventguard 220
Ventilation Maximum Vents 226-227

The minimum requirement to ventilate your home is 1 sq. ft. of ventilation for every 300 sq ft of ceiling area, except in cathedral or less than 2/12 pitch when 1 sq. ft. of ventilation is required for every 150 sq ft.

To give the correct air circulation, 50% of this vent area should be in the roof and 50% in the soffit.

To determine the square footage measure the length and width dimensions of your attic space, including the overhang of the roof. Multiply each separate roof area where applicable; $L \times W$, and treat them as separate areas to be ventilated.

Spar-Marathon B50 Aluminum Roof Vent

Classical design and sound construction in an economically priced roof vent.

Aluminum mesh screen covers underside of hood and vent opening to prevent intrusions by animals, insects and debris. Available in aluminum, black, brown, weathered wood and mill finishes. Also available in brown and black galvanized steel. Net free area 50 sq. in.

Spar-Marathon Copper Roof Vent

Check out our copper roof vent featuring:

- · Extra heavy duty construction
- 50 sq. inches net free area
- Extra large 19" x 18" flange making it excellent for cedar, slate, etc.

ShingleVent® II

- 12" width for most applications
- 18 sq. in. NFA per linear ft.
- External baffle and weather filter
- 3/12 to 16/12 roof pitch
- Dade County Approval Code: 06-0411.10
- Lifetime warranty; Replacement Plus[™] protection
- Available in black and brown

SLA Slant Aluminum

- 1-piece base and throat is weather tight and adds strength
- Large flange for easy installation
- NFA (square inches): 50/pc.
- 3/12 to 12/12 roof pitch
- 8" opening

RVG 55 Slant Galvanized

- Heavy-duty galvanized construction
- NFA (square inches): 50/pc.
- 8" opening
- Optional filter available

SPAR-Marathon • www.sparmarathon.ca

Whirlybird Series

- Permanently lubricated upper and lower ball bearings.
- All aluminum construction.
- Exclusive vari-pitch base adjusts to 12/12 roof pitch.
- Lifetime warranty transferrable.
- · Reduces energy bills ..
- Available in 12" and Big Whirlybird 14" which moves up to 37% more air.
- Colours Available: Black, Brown, Mill and Weathered Bronze.

BIB – Dade County approved Acceptance # 96-0123.01

- Optional pneumatic nail gun or hammer installed.
- Two coils of 1 3/4" nails provided.
- Compact 30 foot roll Is easy to handle.
- Superior weather protection and performance with no filter to clog.
- Full 11 sq. in. of net free area per linear foot.

OR-20 OmniRoll - Roll-out Shingle Over Ridge Vent

- Patented design brings you the truly functional roll-out
- 18" net free area per linear foot
- Compact twenty (20) foot roll is easy to handle
- Can be cut at one-foot intervals multiple cut lines eliminate unnecessary scrap
- Patented molded fanfold end plugs no accessories or alterations needed
- Omni baffles mean air flow from any direction
- Supported nail holes every foot will not crush down

LPR Low-Profile **Ridge Vent**

- Embossed aluminum finish for added strength, extended paint life, and blending appearance with shingles.
- · One-piece construction.
- · Low profile blends with roof construction.
- · Pre-notched nail holes for easy installation.
- Colours Available: Black and Brown

V-Plua

Tight fitting high-density polyethylene foam end plug available.

OR-4 OmniRidge Shingle Over **Ridge Vent**

- 18" Net Free Area per linear foot
- Weatherproof under-lapping joint
- Four drain holes per foot per side
- 10 supported nail holes
- Molded nail lines
- Alignment tabs
- Patented molded fanfold end plugs - no accessories or alterations needed

OW-4 OmniWall™ Shingle Over Vent

Functional ventilation for where your roof joins the wall

- 9" Net Free Area per linear foot
- · Pre-formed to 3/12 pitch
- · Supported nail holes
- · Molded nail lines
- Alignment tabs

WINNIPEG, MB (204) 338-7613

220 VENTILATION

Weather Protection:

The PROVentilator's patented internal baffles deflect wind driven snow and rain allowing moisture to drain harmlessly out of the drainage openings.

Air Flow:

The chimney style design allows the PROVentilator to harness wind energy and create pressure variances that powerfully draw air out from within the attic space. The baffle system is designed to allow for high air flow while providing excellent defense against moisture penetration.

Roof vents are the most common entry point for vermin. Control the wild and protect your roof vents by covering them with VentGUARD PLUS. VentGUARD PLUS protects roof vents against wildlife, falling debris, hail, shingle mold, and damage from snow removal.

Rangehood Exhaust Vent with Adapter Collar

- For venting kitchen range hoods and other large exhaust fans through the roof
- Large enough to handle the most modern, high powered kitchen fans
- The seamless body and dual flapper system prevents back draft and weather infiltration
- Includes a 6", 7" and 8" adapter collar

Bathroom Soffit Exhaust Vent

Makes adding a bathroom fan easy and virtually invisible. Eliminates the need for penetrating roof or wall. Will connect to 4" or 5" ducting or pipe.

Dektite Combo

Suitable for both standard and retrofit applications. When retrofitting is requires just cut and apply clips for ease of application. Clips included in purchase.

Larger square base will cover a larger opening. More forgiving for penetration openings and allows for steeper roof pitch

224 VENTILATION

Ridge Vent On A Roll

Attic Ventilation System

Provides maximum ventilation.

Benefits

- Easy to center over ridge
- Creates a smooth finish
- Prevents rain, snow and insect infiltration
- Easy to handle for quick installation
- Simplifies the aligning of shingles

Features

- See through hinge
- Compression resistant design
- Visible nail line
- 2-1/2" nails provided
- Roll length 20'
- Net free area 18 in²/lin ft
- Available in standard width 10.5" or metric 11.5" (29.21 cm).

Ridge Vent On A Roll

Rapid Ridge offers the same benefits and features as Roll Vent. as well as:

Width 10.5"

- · For use with nail guns
- Almost invisible once installed
- 12.5 in²/lin. ft.
- 1.75" coil nails provided
- RRR20 20' long.

Also Available: Rapid Ridge 7

For use with narrow hip and ridge shingles, cedar and slate. Width 7". RRR7 20' long.

X18 Extra Xtractor Vent

4' Sectional Ridge Vent with Internal Filter

Benefits

- · Maximum ventilation
- Extra protection against extreme weather
- Prevents rain, snow and insect infiltration
- Assures proper nail placement
- Protects seams from leaks
- Reduces scrap
- · Prevents water build-up

BENJAMIN OBDYKE

Features

- · External and internal baffles
- · Embossed nail line
- Male/female connection between pieces
- Integrated end plugs throughout
- Drain holes throughout exterior baffle
- Narrow 1/8" wide vent holes
- 18 in²/lin. ft. net free area

Shark Vent Extra

Rigid, externally baffled, nail gunnable ridge vent on a roll with additional filter for extreme weather areas. 12 in²/lin. ft. net free area.

Cedar Breather_

Cedar Breather

Allows for a continuous air space between roof deck and shingles

- · eliminates excess moisture
- reduces potential rotting and warping
- allows entire underside of shingle to dry
- cushions the shingle during severe hail

Easy to install

- not affected by UV light
- packaged in 61.5'L x 39"W rolls (approximately 200 square feet)
- lightweight easy to handle
- · no special tools required
- eliminates the need for furring strips

Durable

- not affected by heat or cold
- patented 3 dimensional nylon matrix

Models for Sloped Roof

Vents available in Black, Brown and Grey

Model #301

- Can ventilate 1000-1200 sq. ft.
- Universal base flashing for slopes 1/12 to 15/12
- Replaces two 14 inch or three 12 inch turbines

Model #302

- Can ventilate 400-500 sq. ft.
- Universal base flashing for slopes 1/12 to 15/12
- Replaces one 12 inch turbine

Model #303

- Can ventilate 700-800 sq. ft.
- Universal base flashing for slopes 1/12 to 15/12
- Replaces one 14 inch turbine

Models for Flat Roof

Vents available in Black, Brown and Grey

Model #101

- Can ventilate up to 600 sq. ft.
- 45 degree angle base flashing to fit over a curb
- Can also be ordered with a flat base for torched down membrane application
- Replaces three to four gooseneck ventilators

Model #201-12-MB

- Can ventilate 325-425 sq. ft.
- Flat base, insulated interior
- 4 louvers

Model #102

- Ventilation area = 150 sq. ft.
 - 45 degree angle base flashing to fit over a curb
- Can also be ordered with a flat base for torched down
 membrane application
- Standard colours: grey only

4 Seasons 10 Watt Solar Fan

The 4 Seasons 10 watt solar fan is our versatile model designed and built specifically for Canadian weather. Featuring a lightweight and durable SMC anti-UV/ Freeze construction it can withstand weather conditions such as strong winds, hail and freezing rain.

Specifications:

- 10 Watt photovoltaic solar panel.
- Cools up to 500 sq feet of attic space.
- Ventilates up to 400 CFM.
- 3 Wing aluminum corrosion resistant blade
- SMC Anti-UV/Freeze material.
- · Brushless ball bearing motor.

- Wildlife resistant.
- Leak proof flashing.
- Quiet operation and minimal vibration.
- No electrical set up.
- · Fully assembled.
- Easy installation.

10 YEARS

Also Available In **15 Watt Version**

- 15 Watt monocrystalline photovoltaic solar panel.
- Cools up to 1,000 sq feet of attic space.
- Ventilates up to 800 CFM.
- 5 Wing aluminum corrosion resistant blade.
- 30 Watt double sealed ball bearings (maintenance free motor)

Also Available In Flat Roof Version

- 10 Watt photovoltaic solar panel.
- . Cools up to 500 sq feet of attic space.
- Ventilates up to 400 CFM.

solar ventilation

4 Seasons PRO

The 4 Season PRO is designed and built specifically for sloped shingle roofs and offers extra protection in severe weather.

It is excellent for steep roof applications. The unique shape helps prevent wind driven rain and snow from blowing into the attic while the slanted hood deflects running rainwater. This vent is the right fit for areas affected by extreme weather conditions.

The vent works by using the sun's energy to power a fan which pulls excess heat, moisture and humidity out of the attic while promoting healthy air circulation.

Solar Skylight

Light Any Room In Your Home At No Cost

- · Bright LED panel
- · Very quick and easy installation
- · No structural changes to your home
- · Energy efficient
- No leakage
- No condensation
- · No heating

All Seasons HP Gable Fan

The All Seasons Gable fan is installed inside the attic attached to an existing gable vent and is powered by the solar panel on the roof. It is most popular on old homes that have gables or dormers. It includes 30 feet of wire for versatility.

- · 27 Watt photovoltaic solar panel.
- Cools up to 2,400 sq feet of attic space.
- Ventilates up to 1,600 CFM.
- 5 Wing aluminum corrosion resistant blade.
- 30 Watt double sealed ball bearings (maintenance free motor)

236 FASTENERS

FS intec

WOODGRIP Screws Woodgrip is the original sheet to wood fasteners designed to self-drill metal panels:

Available in 1". 1-1/2" & 2" lengths.

- High Hex Washer Head provides driving stability and a sharp point for quick installation
- Assembled with a control seal washer for a consistent. weather tight seal and improved installation appearance.
- Zinc plated and Silver Sentri coated with corrosion protection.
- Available in Black, Light Brown, Dark Brown, White

Boof Ballast Slabs

Roof ballast slabs offer the strength, durability and beauty of natural stone, with the potential for time and cost savings because of their ease of installation. Slabs are precision fit with a consistent thickness and a slip-resistant finish.

Durable

Protects against UV rays, accidental punctures and temperature extremes.

Quality

Exceeding Canadian and U.S. manufacturing standards and virtually unaffected by weather conditions.

Strength

Able to support pedestrian traffic.

CALGARY, AB

(403) 255-8236

Typical Applications

- Rooftops
- Terraces

EDMONTON, AB

- Balcony designs
- Commercial buildings

The Paver Support System with Key Design Features

- · Sound dampening
- · Weather-proof vulcanized rubber
- · Strong and non-aging
- · Uniform positioning of slab joints
- Facilitates drainage
- Rigid placement for vehicular traffic
- Height adjustable by leveling plates
- · Easily installed

238 FIBREGLASS MOPS

General Information on Glass Fibre Roofing Mops

Glasphalt is a superior material for roofing mops. It is not affected by hot asphalt like cotton. It will not burn; it must wear out. Glasphalt applies asphalt easier and more uniformly than cotton. These qualities of Glasphalt result in substantial cost savings as well as better and easier application of asphalt.

When changing from cotton to Glasphalt, use this chart:

Cotton	24oz	32oz	48oz	60oz
Glasphalt	4 lb	5 lb	8 lb	10 lb

Cotton absorbs asphalt and increases the weight of the mop. Glass fibres are non-absorbent and deliver most of the asphalt to the deck. A 32oz cotton mop will be heavier than a 5 lb glass fibre mop.

11 lbs 10 lbs 8.5 lbs 7 lbs 5.5 lbs
2.1 lbs

The applicator series are 6 Top Of The Line Glass Fibre Mops. Unplied Glass Fibre in centre core for maximum pick-up. Unplied Glasphalt and standard twist & plied Glasphalt yarn on the outside for good wear. Built-in Voids for added pick-up.

SINO[®] COMMERCIAL

Specify with Confidence.

IKO TORCHFLEX[™] SBS & IKO MODIFLEX[™] SBS

Base & Cap Sheets

Torchflex and Modiflex

High performance modified bitumen roofing and waterproofing systems that are quickly installed, easy to maintain and highly cost-efficient.

Tough, Long-Lasting Construction

Modiflex and Torchflex are made from a strong non-woven mat (fiberglass, reinforced polyester or composite) and coated top and bottom with SBS polymers and premium asphalt. SBS (or Styrene-Butadiene-Styrene) is a rubber-based chemical that gives the asphalt some outstanding qualities: superior elasticity, excellent moisture resistance, and exceptional cold weather flexibility. The end result is a long-lasting, durable membrane which can be applied to a wide variety of surfaces on roofs of almost any shape or design.

Simple to apply and easy to maintain

Modiflex is applied by hot-mopping the membrane with asphalt or coldapplying with an adhesive. Torchflex is applied by heat welding the membrane, fusing it to a substrate, and using the same process to seal the seams. Modiflex and Torchflex are both compatible with existing BUR products. Easy inspection allows damaged areas to be readily identified, and repairs may be performed with a hand torch and round-nosed trowel.

Protection From The Elements

When used as recommended, Modiflex and Torchflex systems provide superior protection against water infiltration and extreme weather conditions.

Modiflex and Torchflex cap sheets are offered with ceramic coated mineral granules embedded into the top surface for greater resistance to damaging ultraviolet rays.

Quality Assurance

Modiflex and Torchflex are both manufactured under stringent quality control conditions, involving ongoing testing and product research. Before finished products leave the plant, they will have displayed high elasticity and tensile strength, optimal granule adhesion, high thermal shock resistance, low temperature flexibility, high fatigue endurance, exceptional resistance to aging and weathering and excellent puncture resistance.

Nothing Tops IKO Quality

IKO manufactures everything under one roof – ours – to maintain the highest level of quality control in the industry. Our people are committed to maintaining this caliber of excellence. That means you can rely on IKO for all of your commercial roofing application needs – from the deck up. Take pride in installing an entire roof system manufactured by a family-owned company that has been committed to manufacturing quality roofing products since 1951.

IKO TORCHFLEX[™] SBS & IKO MODIFLEX[™] SBS

Base and Cap Sheets

The Torchflex and Modiflex family of superior modified bitumen membranes is manufactured in a wide array of cap sheets and base sheets.

Cap sheets, depending on the product type and construction, are available in various colours to suit the specifier's requirements - colour availability is shown in the summary table The standard grade of our tough cap sheets offer proven performance, reinforced with a nominal 180 grade of polyester. Where additional strength may be specified, look to the 250 grade products for a heavier polyester mat. In response to customers' demands for the ultimate in dimensional stability. IKO innovated a hybrid composite mat, incorporating the best properties of both polyester and glass fiber reinforcement. These membranes are noted as HD

Should external roof fire resistance be required or specified, select cap sheets are available in the PrevENt® line, with a specially formulated coating matrix, which provides enhanced fire resistance. See the PrevENt® section of this catalogue for more details on this product line, which IKO developed at their European manufacturing facilities before introduction to North America.

In the Torchflex™/Modiflex™ product summary table you'll also see some cap sheets noted as ArmourCool®. These bright white cap sheets were developed to satisfy the growing

market need for energy-reflecting roof surfaces. The ArmourCool® option is offered in combination with PrevENt® fire resistance and/or HD composite high-strength reinforcements.

The following pages provide greater detail on these excellent cap sheet options.

Base sheets serve that critical transition function between the roof's substrate or insulation layers, and the finished cap sheet. IKO allows for every method of roof specification assembly with its huge range of base sheets – some have upper and lower film surfaces for heatwelding, others have upper and lower sanded surfaces for hot asphalt or adhesive installation, while adhesive surface sheets for self-adhered applications are also available. Various combinations of upper and lower surfaces can accommodate almost every combination of roof installation methods. The entire family of base sheets is made with IKO's own highguality factory-blended polymer modified bitumen, and reinforcement options include tough nonwoven fiberglass, strong polyester or the composite HD hybrid for the best of both materials.

IKO PrevENt®

Cap Sheets

Integrating Premium Performance and Fire Resistance

At IKO, we have enhanced the performance of our premium line of SBS cap sheets to include the highest fire resistance rating available in a roof membrane, Class A rated by UL/ULC and FM.

 Same size, colours and thickness as Modiflex™/ Torchflex™.

IKO Fast-N-Weld® Base Sheets

 This is a labour-saving installation, since the base sheet is mechanically fastened and not fully adhered with asphalt, adhesives or heat-welding.

IKO ArmourCool® Cap Sheets

IKO has integrated the proven long-term performance of our SBS cap sheet with a specially designed reflective mineral granule on the top surface, which reflects solar radiation to a very high degree. In fact, ArmourCool Granular exceeds the stringent reflectivity requirements established by LEED SS7.2.

IKO ArmourStick[™] HD Base and Cap Sheets

This self-adhering roofing system offers an innovative option explicitly tailored to the requirements of projects that demand a restricted flame environment. Simple to install – proper application simply requires a hot air welder to seal the outer 2 inches of the lap for a trusted. no-leak seal

IKO M.V.P.[™] & IKO M.V.P. Sand

Modified Vapour Protector

Vapour Protection

IKO M.V.P. (modified vapour protector) is a self-adhering membrane used over various types of roof decks, such as steel, concrete and wood. This product is designed as a vapour barrier prior to the installation of the roof insulation. IKO M.V.P. is internally reinforced with glass fibers and is composed of modified rubber asphalt.

Type 6 Glass Ply Sheet Type IV Glass Ply Sheet

Tough, dimensionally stable fiberglass from IKO meet or exceed all industry standards and can outperform many other roofing materials. The pure repetitiveness of installing multiple plies of roofing felts – overlapped and bonded with asphalt – significantly reduces the chance for roofing leaks. As a result, building owners receive a solid return on their investment with years of durability and hasslefree service. IKO's traditional built-up roofing systems will provide the following benefits. IKO MVP is available in either a cross laminated polyethylene film top (IKO

M.V.P.) or sand top surface (IKO M.V.P. Sand) to suit a variety of insulation application methods.

PRODUCT NAME	SIZE (L X W) M X MM (FT X IN)	QUANTITY PER PALLET

IKO Protectoboard™

Protection and Separation

Protectoboard is a dimensionally stable roofing board that can be mechanically fastened, hot asphalt applied or installed with an acceptable adhesive. Protectoboard is fabricated with a mineral-reinforced asphaltic core sandwiched between two layers of nonwoven glass fiber reinforcement. This composition offers remarkable reliability in the face of environmental conditions, and provides additional fire resistance.

Uses

Installed over an existing roof, Protectoboard provides a durable substrate that offers excellent resistance to torch flames required to install heat-weldable membranes. It is ideal for covering combustible roof components such as wooden parapet walls.

Protectoboard can also be applied as a protective layer over the waterproofing material in construction, such as: bridge and podium decks, vertical walls and parking garages.

IKO Protectobase[™] 180

Protectobase 180 is a composite of IKO ProtectoboardTM, and a factory laminated SBS modified bitumen base sheet. This product can be used as a cover board for new or existing roof construction. The base sheet of Protectobase includes a dual selvage self-adhering SBS sidelap that is staggered from the products' end lap and side lap to allow easy joining of the base to adjacent Protectobase boards. This allows for a quick application of 36" x 8' sheets with 3/16" Protectoboard.

IKOTherm CoverShield[™]

A rigid foamed plastic polyisocyanurate roof board that comprises inorganic coated glass fiber facers with a closed-cell, high-compressive strength foam core. This product can be used as a coverboard for new or existing roof construction. Available in 4" x 8" x 1/2" thick.

IKO Sheildbase[™] 180

A composite of an IKOTherm CoverShield polyiso insulation panel that is factory laminated to a nominal 180 g/m² weight polyester reinforced SBS modified bitumen base sheet. This product can be used as a coverboard for new or existing roof construction. The 90-mm (3.5-inch) dual selvage self-adhering edges of the membrane portion allow easy joining of the base to the adjacent ShieldBase boards. This allows for a quick application of the roofing system's base layer. Each board is 3' x 8' for a total area of 24 ft².

IKO Millennium[™] Roofing Adhesive

Designed for use as an adhesive for bonding roof insulation/cover board panels to approved substrates such as other insulation boards and smooth or properly prepared built-up roof surfaces. Eliminates the need for mechanical fasteners.

IKO S.A.M.® Adhesive

Quick-drying, solvent-based surface preparations for use with IKO selfadhering roofing membranes. S.A.M. Adhesive dries to a high tack, providing excellent adhesion properties during the membrane application process and are especially effective on vertical surfaces.

IKO MS Detail[™] Liquid Membrane

Ideal for all those hard-to-flash areas on a roof. It's a fast, convenient, singlecomponent liquid membrane. This liquid-applied grey-coloured membrane requires nothing more than ambient water vapour in the air to cure to a rubber-like consistency. Easily applied with a trowel, brush or roller.

IKO Cold Gold®

IKO Cold Cold® Field Adhesive is a solvent-free, single-component, cold-process roofing adhesive suitable for adhering vapour retarders, IKOTherm® insulations, coverboards and Modiflex Base/ Cap sheets. It can be easily applied with a suitable notched trowel or squeegee. Can also be used as a flood coat, a cold alternative to hot asphalt. Flashing adhesive is also available.

ELEVATE Elevate RubberGard EPDM is a lightweight, high-strength single-ply membrane ideal for a wide range of commercial roofing installation.

Versatile, clean, and safe to install, a number of engineered Rubbergard Systems are available, including ballasted, mechanically anchored, and fully adhered, assuring the optimum assembly for each roofing job.

Elevate products are available in different roll widths, lengths and thicknesses. Please contact us for details.

SPAR-Marathon • www.sparmarathon.ca

ELEVATE

Loose-Laid Ballasted EPDM Sheet Roofing Systems

A ballasted Elevate roof is the most economical of the various RubberGard Systems and is suitable for a wide variety of buildings.

Ballast RubberGard EPDM Membrane

Elevate ISO 95+ Insulation

In the Ballasted System,

Rubbergard EPDM panels are loose laid over an acceptable substrate.

Adjoining sheets are overlapped at least 3" and spliced with Elevate adhesive to form a continuous, watertight membrane.

Once the spliced and flashed edges are sealed, the EPDM membrane is ballasted with a minimum of 10 lbs per sq. ft. of 3/4" - 1-1/2" round, river-washed stones.

Protected Membrane EPDM Sheet Roofing Systems

The Protected Membrane Roofing System (PMR) is a variation from the conventional ballasted roof. With this system, the membrane is positioned below a portion of the thermal insulation.

As a result, the roofing membrane is protected year-round from surface damage and severe weather conditions. This system is ideal for roofs with regular traffic or in severe climates.

Adjoining panels are overlapped a minimum of 3" and spliced using Elevate Splice Adhesive to form a continuous, watertight membrane.

SERVICE IS OUR SPECIALTY · SPAR-Marathon

Acceptable Substrate

276 EPDM

ELEVATE Mechanically Anchored EPDM Sheet Roofing Systems

The Mechanically Anchored System is preferred on roofs which cannot carry the additional load of ballasted systems, and is generally less costly than a fully adhered system.

Elevate's Batten-in-the-Seam System uses 7-1/2' wide panels, anchored by battens that are installed in the seams of adjoining sheets.

The batten strips, in turn, are anchored by Elevate fasteners and sealed with Elevate Fastener Sealer.

Adjoining EPDM sheets are overlapped 7" to cover the batten strip and spliced with adhesive to form a continuous, watertight membrane.

Fully Adhered EPDM Sheet Roofing Systems

The Elevate adhered roof is a lightweight system with outstanding design flexibility. It is ideal for contoured roofs and any roof with limited load-bearing abilities.

The adhered system does away with ballast or mechanical attachments. EPDM panels are fully adhered to an acceptable substrate.

Adioining sheets are overlapped and spliced RubberGard EPDM with Elevate adhesive or Membrane Bonding Adhesive QuickSeam Splice Tape to form a continuous, water-Elevate ISO 95+ Insulation (mechanically attached to tight membrane. substrate) Acceptable Substrate TORONTO, ON WESTON RD (WESTON) PICKERING, ON SIGNET DR (WESTON) (416) **534-8421** (905) 426-4443 (416) 745-4111 (416) 744-2050

EPDM Ouickseam Accessory Listing

Quickseam Splice Tape

- available in 3", 6" and 7" wide
- used for field splicing of membrane panels. where a taped seam is required.

Quickseam Flashing

a 5" tape used to flash gravel stop

Ouickseam Batten Cover Strip

- available in 6", 9" and 12" wide
- · used to cover, protect, and seal batten strips in mechanically anchored systems.

Ouickseam Reinforced Perimeter Flashing Strip (R.P.F.)

 Quickseam tape factory laminated to a 6" wide reinforced EPDM

Quickseam R.M.A. Strip

 R.M.A. Strip is a 10" wide RubberGuard MAX membrane with two 3" wide strips of guickSeam Tape factory laminated to it along its length. It is used for roof membrane attachment beneath RubberGuard membrane

Ouickseam Form Flash

- Available in 9", 12" and 18" wide
- QuickSeam FormFlash is uncured EPDM factory laminated to QuickSeam Tape. It is designed to flash inside and outside corners, pipes, penetration pockets

Quickseam 18" S.A. Flashing

 18" wide 60 gauge EPDM membrane fully laminated with QS Tape on the back side. SA Flashing can be used for curbs or parapets where flashing heights allow

ELEVATE

Quickseam Curb Flashing 18"

• 18" wide 60 gauge EPDM membrane with 3" wide tape along one edge. The 3" tape portion is used to join to the roof membrane. The balance of the Curb Flashing is applied to the vertical surface with EPDM Bonding Adhesive

Quickseam Corner Flashing

 to flash inside and outside corner at rooftop or wall intersection where EPDM is used as a base flashing

Quickseam Walkway Pads

 protects the membrane from damage due to necessary rooftop services. Installed using Quickseam Splice Tape.

Quickseam Universal Pipe Flashing

 a prefabricated pipe boot with a butyl/EPDM adhesive laminated to the bottom of the flange

Ouickseam Joint Covers

 used to cover and seal "T" joints formed by field intersections

OS6 Penetration Pocket Kit

 Labour saving alternative to conventional penetration pockets, Penetration Pocket is produced with factory laminated QuickSeam Tape, making installation possible to RubberGuard EPDM, TPO, APP and SBS. For penetrations up to 4.0"

OS10 Penetration Pocket Kit

 Labour saving alternative to conventional penetration pockets, Penetration Pocket is produced with factory laminated QuickSeam Tape, making installation possible to RubberGuard EPDM. TPO. APP and SBS. For penetrations up to 8.0"

BARRIE, ON

Also Available:

- QuickScrubber Plus Stand-Up Tool (w/ Pads and Handles)
 Quickseam Silicone Roller
- QuickScrubber Kits (Pads and Handles)
 QuickRoller
 Quickseam Roller Sleeves

OAKVILLE, ON LONDON, ON HAMILTON, ON (905) 825-0034 (519) 668-3626 (905) 560-2858 (705) 792-6683

ELEVATE EPDM Flashings, Sealants, & Adhesives

Quickseam Conduit Flashing

 Specifically designed to be used in roofing applications for flashing of rigid round penetrations and conduit. Conduit Flashing will fit various size penetrations from 1/2" - 2-1/2" and can be cut to desired diameter before installation

Quickprime Plus

- used in conjunction with Quickseam tape products as a cleaner/primer
- · Available in 3 gal. and 1 gal. pails

EPDM Formflash

- used to flash base tie-ins, curb flashings and cap joints
- Available in 6", 9", 12", 18", 24", 36" and 48" sizes

Lap Sealant

 used for sealing the exposed edge of membrane laps

Bonding Adhesive

 designed for bonding EPDM or formflash membranes to wood, metal, masonry and other acceptable substrates

Splice Adhesive

 used for field splicing of EPDM membrane panels, formflash and the attachment of field panels to Quickseam R.P.F. strip

Splice Wash

 designed to clean and prepare EPDM to receive splice adhesive

Termination Bar

 heavy extruded aluminum bar used for exposed vertical terminations

Metal Batten Bar

 used in batten in the seam systems and mechanically anchored systems

I.S.O. Twin Pack™ Insulation Adhesive

 I.S.O. Twin Pack Insulation Adhesive is a twocomponent low-rise polyurethane adhesive designed for anchoring acceptable roof insulation to acceptable substrates, and to adhere multiple layers of insulation.

Pourable Sealer S-10 Part A & B

 Pourable Sealer (S-10) is designed for sealing penetration pockets used in conjuntion with Elevate roof systems.

White EPDM

EcoWhite[™] EPDM

- · Low slope FR EPDM panels, .060 LSFR (fold free)
- 10'x100', 1,000 sq. ft. per roll, 0.43 lbs. per sq. ft.

EcoWhite™ Flashings, Sealants & Adhesives

- EcoWhite[™] EPDM Lap Sealant
- EcoWhite[™] EPDM Splice Adhesive
- EcoWhite[™] EPDM Quickseam[™] Pipe Flashing

🔊 ELEVATE

TPO Roofing Systems

Elevate markets a hot-air welded, thermoplastic roofing system that provides outstanding chemical resistance and energy efficiency in a highly flexible sheet. UltraPly TPO is based on polypropylene.

- scrim-reinforced for added strength
- · heat-welded seams
- resists UV radiation, ozone and chemical exposure
- energy efficient white reflective surface
- compatible with a variety of substrates
- available in 60", 72", 120" and 144" x 100' rolls

UltraPly Accessories

Elevate offers a wide range of accessories specially engineered for use with UltraPly heat-welded membrane. These include: pre-molded pipe boots, inside/outside corners, walkway materials, coated metal, plates and bonding adhesive.

SPAR-Marathon • www.sparmarathon.ca

ELEVATE

TPO Accessories

TPO Flashing

Non-reinforced membrane to be used where pre-molded TPO products are not appropriate. Roll size 24"x50'.

TPO T-Joint Cover

Used to cover and seal all T-joints formed at seam intersections.

TPO Universal Pipe Flashing

Used for flashing of round penetrations.

TPO Inside/Outside Corner

Pre-moulded TPO Inside/Outside Corners are to be used for flashing inside and outside corners on curbs, parapets and scuppers.

TPO 18" Curb Flashing

Used for flashing curbs and parapet walls. TPO Curb Flashing is sold in 50' rolls, making it easy to handle. Each 50' roll will flash three 4'x4' curbs, with virtually no waste.

TPO QuickPrime

TPO QuickPrime is used to clean and prime UltraPly TPO membrane areas prior to application of Quickseam® tape products & accessories.

TPO QuickSeam Reinforced Perimeter Fastening Strip

UltraPly QuickSeam Reinforced Perimeter Fastening Strip is a 6" (152.4 mm) wide UltraPly TPO membrane with 3" (76.2 mm) wide Tape factory laminated along one edge.

TPO HD Seam Plate

HD Seam Plates are to be used for the attachment of TPO membranes to substrates. Seam Plates are to be used with Elevate HD or All-Purpose Fasteners.

SERVICE IS OUR SPECIALTY • SPAR-Marathon

TPO General Purpose Sealant

This high quality sealant has excellent adhesion to a variety of surfaces. For use as a Fastener Sealer and Termination Bar Caulk.

TPO Cut Edge Sealant

TPO Cut Edge Sealant is used to seal all cut edges of TPO membrane where the polyester reinforcement is exposed.

TPO Coated Metal

TPO Coated Metal is made from a flexible non-reinforced thermoplastic polyolefin membrane factory laminated to hot-dipped galvanized steel.

TPO Walkway Pad

TPO Walkway Material is composed of 100% recycled thermoplastic materials and processed into 50-foot long rolls.

Water Block Seal

Used for caulking drains.

Termination Bar

Heavy extruded aluminum bar used for exposed vertical terminations.

Metal Batten Bar

Used in batten in the seam systems and mechanically anchored systems.

TPO Penetration Pocket

Used to seal around odd shaped penetration or small clusters of penetrations.

UltraPly™ TPO SA

Elevate UltraPly™ TPO SA with Secure Bond Technology is a revolutionary self-adhereing membrane with factoryapplied, pressure-sensitive adhesive that greatly increases the number of square feet that can be installed in a day.

PICKERING, ON TORONTO, ON WESTON RD (WESTON) SIGNET DR (WESTON) (305) 426-4443 (416) 534-8421 (416) 745-4111 (416) 745-4111 (416) 744-2050

ELEVATE

PVC Membrane

Appropriate for a wide range of low-slope commercial roofing applications, Elevate's PVC roofing membrane is a durable, chemical and grease resistant roofing solution for a variety of building types.

Plus. PVC is self-extinguishing, making it one of the most fire-resistant single-ply roofing membranes available today. Elevate's PVC system is also a cool roof solution that's designed to reflect sunlight and absorb less heat, helping mitigate the urban heat island effect. This mitigation helps lower heat

PVC Accessories

PVC Bonding Adhesive

Designed specifically for bonding Elevate PVC membranes and flashings to wood, metal. masonry, and other acceptable substrates.

PVC Clear Cut Edge Sealant

Optional treatment used for sealing cut edges of the PVC membrane where scrim reinforcement is exposed.

PVC Universal Pipe Flashings

Designed for the flashing of round penetrations.

PVC T-Joint Covers

Designed to cover and seal T-ioints formed at seam intersections and angle changes.

PVC Inside and Outside Molded Corners

For flashing inside and outside corners on curbs, parapets, and scuppers.

transfer to a commercial building's interior and decrease air conditioning demands, keeping occupants comfortable and building owners satisfied.

PVC 8" Cover Strip

This heat weldable cover strip can be used as a cover for intermediate or perimeter mechanical attachment on PVC systems as well as for stripping in PVC Coated Metal.

Unsupported PVC Flashing

Used in roofing applications where Elevate pre-formed PVC accessory products are not appropriate.

PVC Walkwav Pad

The pad is produced in 30" (762 mm) wide by 60' (18.3 m) long rolls: grey in color or safety vellow to highlight traffic and maintenance pathways.

PVC Clad Metal

PVC Clad Metal can function as a flashing component for the Elevate PVC System.

🔊 ELEVATE

EPDM Membrane

FullForce[™] EPDM

The only EPDM membrane to feature a factory-applied adhesive across its entire surface. Without the need for seam tape or adhesive. It installs 4.6x faster than standard EPDM membrane* including seams.

RubberGard™ EPDM Platinum™

Designed with 90-mil of uninterrupted thickness, the RubberGard™ EPDM Platinum™ Membrane is, quite simply, our best roof..

RubberGard[™] EPDM Pre-Taped

Easier and faster to install due to the factory installed seam tape.

EcoWhite[™] EPDM

Provides building owners with the proven performance of traditional RubberGard EPDM, while providing the additional benefit of keeping the roof cooler.

RubberGard[™] MAX EPDM

RubberGard[™] MAX (reinforced) EPDM membrane is an internally reinforced cured single-ply roofing membrane that is designed to combat roof tears and punctures and provides superior resistance to wind forces.

RubberGard™ EPDM R.M.A.

Uses large EPDM panels bonded to Elevate's QuickSeam™ R.M.A. strips to provide uninterrupted, weatherable, thick, large panels to deliver faster installation

CALGARY, AB	EDMONTON, AB	WINNIPEG, MB
(403) 255-8236	(780) 432-2786	(204) 338-7613

Three types of asphalt are presently in use for the construction of built-up roof systems, dampproofing systems, and waterproofing systems.

Asphalt - 50 lb Bag, 100 lb Keg

Type 1 - Dead Level

Asphalt is relatively susceptible to flow at roof temperatures with good adhesive and self-healing properties. It is generally used in aggregate-surfaced roofs on slopes of up to 1/2" inch per foot.

Type 2 - Flat

Asphalt is moderately susceptible to flow at roof temperatures. It is generally used on roofs with slope between 1/2" to 1-1/2" inch per foot.

Type 3 - Steep

Asphalt is relatively non-susceptible to flow at roof temperatures. It is generally used on roofs with slope between 1" inch to 3" inches per foot.

Bags - Type 3

Entire 50-pound bag goes directly into the kettle, including the wrapper, completely melting down and leaving no residue and no wrapper to dispose of.

Vapour Retarder (Kraft Paper)

Constructed of 2 plies, high-wetstrength kraft, laminated with asphalt. The edge is reinforced with glass fibre strands, providing the vital function of preventing moisture from the interior of the building from entering the roof assembly.

Available in 34", 68" and 96" size rolls

SPAR-Marathon •

www.sparmarathon.ca

Eliminate Ponding Water

RoofSlope[®] One Coat Application

The RoofSlope® product is an acrylic modified cementitious sloping material designed to create auxiliary slope over various roofing membranes to divert water flow to drains, scuppers, or an outside edge.

This product combines a proprietary blend of cementitious polymer emulsions and aggregates to achieve a workable, easy to use, sloping compound.

The RoofSlope® material has the ability to be installed in a single application!

The RoofSlope® product provides a quick and easy way to fill in low spots on flat roofs and achieve positive slope to aid in proper drainage. This product provides a durable finish that has the ability to incorporate the appropriate coloured granules to match the existing roofing composition.

RoofSlope® material is excellent for new construction as well as retrofit work to help minimize costly removal and/or additional framing expenses required to remedy slopeto-drain issues.

Advantages

- Cost effective
- · Fast drying
- · Extremely durable
- · Easy to install
- · Tremendous bond strength
- Monolithic
- Water-based
- UV Stable
- · Ability to match a variety of roof finishes
- · Patent pending technology

SERVICE IS OUR SPECIALTY · SPAR-Marathon

The fire, wind uplift, moisture resistance, strength and durability make dens-deck the right choice for:

- overlayment (fire barrier)
- underlayment (thermal barrier)
- re-roof/recover board

For single-ply, modified bitumen, built-up roofing systems or other commercial roofing systems

Dens-Deck Glass Mat Gypsum Roofboard

Dens-Deck Prime Roofboard

DENS-DECK® PRIME ROOF BOARD

All the properties of dens-deck, plus...

- · creates a more consistent bond
- · reduces adhesive requirements
- · allows uniform drying time
- reduces fastener requirements

For fully-adhered single-ply systems, torch and cold-applied modified bitumen systems and commercial roofing systems where a sealed surface is desirable for a highly consistent bond.

Dens-Deck and Dens-Deck Prime are available in 4'x8' sheets in 1/4", 1/2" and 5/8" sizes

288 INSULATION

SIKO COMMERCIAL

Specify with Confidence.

IKOTherm[®] Roof Insulation

IKO manufactures a comprehensive line of polyisocyanurate roof insulations to suit almost every roof specification. Polysio offers the highest insulating "R-Value" per thickness of material relative to all commercially available roof insulation options. Lightweight and easy-to-handle, IKOTherm® polyisocyanurate foam roof insulations are designed to be part of modified bitumen, built-up or single-ply roof systems.

The Original – IKOTherm[®]

PICKERING, ON

Standard IKOTherm® is faced on the top and bottom surfaces with select

kraft paper, reinforced with glass fiber strands for high strength and excellent absorption for both hot mopping and adhesiveattachment methods. The product also performs well with mechanical fasteners.

IKOTherm 25 PSI

Where a higher degree of insulation compressive resistance is specified or required, IKOTherm® 25 PSI grade is available. Ideally suited for use beneath single-ply roof systems, it can also be used in conventional BUR or modified bitumen roof assemblies.

IKOTHERM T	IKOTHERM THERMAL VALUES										
Nominal	Thickness*	RSI Units**	R-Value**								
mm	inches	LTTR ¹	LTTR ¹								
25	1.0	1.0	5.7								
38	1.5	1.50	8.5

ACFOAM[®] NAIL BASE

ACFoam Nail Base Insulation is a thermally efficient polyiso insulation board bonded to 7/16" APA/TECO rated OSB on the top side and glass fibre-reinforced felt facer on the bottom. ACFoam Nail Base Insulation provides the desirable benefits of both a nailable surface and insulation, making installation an easy one-step labor saving process. This product is made to order in 4' x 8' (1220mm x 2440mm) panels and in nominal thickness of 1.5" to 4.5".

VENTED-R®

Cross Vent[™] allows maximum ventilation while providing a high quality nailable surface and excellent long-term thermal values in an energy efficient polyiso foam insulation, all in a one-step labor-saving process.

EDMONTON, AB

(780) 432-2786

- satisfies ventilation requirement of asphalt shingle manufacturers
- large standard vent spaces available
- increased free air space beneath nailing surface
- lateral air flow to feed hips and valleys
- ventilating spacer strips provide greater support for OSB than other available products

CALGARY, AB

3

Is an extruded, expanded, polystyrene foam. The board has smooth, high density skins, a closed cellular foam

structure and shiplap edges on four sides (on boards greater than 1" thick).

Protected Membrane Roofing Systems

- insulates the building and the membrane and protects the membrane
- withstands physical abuse and routine maintenance traffic
- closed cell structure resists moisture
- can be used with all types of roof membrane
- applicable for both new and retrofit roofs
- can also be used as conventional roof insulation

Protected Membrane Roof (PMR) with ROOFMATE Brand Insulation

stone ballast water permeable fabric roofmate insulation roof membrane thermal barrier (if required) roof deck (all types)

The PMR System consists of:

- 1 ROOFMATE insulation loose-laid over the roof membrane. The insulation may also be adhered as per the design specifications.
- 2. A water permeable fabric such as FABRENE® V.I.E. loose-laid over the ROOFMATE.
- 3. Stone ballast uniformly spread over the fabric.

ROOFMATE										
Size	R Value	Size Ft.	Piece/Sleeve (GD)	Sq. Ft./Sleeve						
1.0	5.0	2 x 8	24	384						
1.5	7.5	2 x 8	16	256						
2.0	10.0	2 x 8	12	192						
3.0	15.0	2 x 8	8	128						
4.0	20.0	2 x 8	6	96						

STYROFOAM DECKMATE* and STYROFOAM DECKMATE PLUS

brand insulation are specifically designed to provide high quality, economical insulation for all conventional roofs; with single-ply, 2-ply or 4-ply roof membranes.

Specifics

DECKMATE roof insulation is an extruded, expanded polystyrene foam. The board has smooth, high density skins and a closed cellular foam structure. STYROFOAM DECKMATE PLUS brand insulation is designed specifically to provide a higher compressive strength for additional membrane support for all conventional roofs including single-ply, 2-ply or 4-ply membranes.

DECKMATE										
Size	R Value	Size Ft.	Piece/Sleeve (GD)	Sq. Ft./Sleeve						
1.0	5.0	2 x 8	24	384						
1.5	7.5	2 x 8	16	256						
2.0	10.0	2 x 8	12	192						
3.0	15.0	2 x 8	8	128						
4.0	20.0	2 x 8	6	96						

Application

DECKMATE and DECKMATE PLUS roof insulation can be used over any substrate, in new construction, for thermal upgrading of existing roofing or when reroofing is required. Roof substrate must be clean, dry, smooth and free from oil, grease, rust, frost and snow.

Technical Data

STYROFOAM DECKMATE insulation conforms to CAN/ULC S701 type 2 and is listed under CCMC Listing #12085-L.

DECKMATE PLUS conforms to CAN/ULC S701, Type 3 and is listed under CCMC listing #11420-L.

296 INSULATION

Foamular[®] Polystyrene Rigid Insulation

High-density PINK® extruded polystyrene (XPS) rigid insulating boards. FOAMULAR® boards are manufactured using Owens Corning® patented HYDROVAC® technology. Owens Corning uses blowing agents that meet or surpass government environmental requirements. Their outstanding compressive strength, dimensional stability as well as their excellent thermal resistance (RSI 0.88/25 mm; R-5/in.) and hydrophobic properties make them an excellent insulation choice for use in large civil engineering works, for roofing and terraces, road applications and other projects.

To comply with new environmental regulations, Owens Corning[®] FOAMULAR[®] NGX[™] insulation is produced with an innovative blowing agent that delivers a 90% reduction in GWP[↑], offering the same great quality and performance you've come to expect from the FOAMULAR[®] brand, with less environmental impact.

- · Long-term thermal resistance
- R-5 per inch of thickness
- High compressive strength with long-term thermal performance
- Hydrophobic insulation, closed cell structure
- Ability to retain critical structural properties in severe freeze thaw environments
- · Excellent resistance to water
- · Handles and installs easily
- Minimum 20% recycled content, SCS Certified

Ballast Fabrics Fabrene V.I.E.

Crushed Stone or Gravel
Fabrene V.I.E.
Membrane
Insulation
Deck

Protects insulation boards from displacement and protects joints from penetration of water and ballast fines. The fabric reduces mechanical damage to insulation, permits the use of lower cost ballast with more fines, enables better stone distribution and allows easy stone removal for access to flashings, insulation and membrane.

A high performance, flexible, easy to install woven polyethylene roofing fabric, Fabrene V.I.E. has been specifically designed for structural integrity and moisture impermeability. It resists water and UV degradation, is highly resistant to tearing and is crack-resistant to -50°C (-58°F), permitting year-round application.

Roll dimensions 12' x 327'

Terratrack 200W

- a woven geotextile ballast fabric
- size 12.5' x 433.4'

Gemini[™] One-Piece Drain Set

Pre-manufactured drain set helps eliminate ponding that accumulates around the drain. 4'x4' Piece. 1.5" at outside edge. 0" at inside drain.

Gemini[™] Tapered Edge Strip

Available in a standard thickness to help you achieve positive drainage, and is the only polyiso insulation with the Zero Edge™ solution. 2'x8' Piece, 2" at one edge, 0" at other edge.

302 CEMENT & COATINGS

Asphalt Plastic Cement

Solvent base trowel consistency plastic cement can be used for flashing, eaves, skylights and cementing down loose shingles. Available in 20 kg, 12 kg, 300 ml.

Premium Wet/Dry Plastic Cement

Premium quality asphalt base roof cement designed for repairing roofs and roof flashing wet or dry. Available in 20 kg or 12 kg.

Non-Fibrated Roof and Foundation Coating

An economical means of recoating and preserving smooth surface asphalt roofs as well as dampproofing concrete foundation walls. Available in 18.93L.

CALGARY, AB (403) **255-8236** EDMONTON, AB (780) 432-2786 WINNIPEG, MB (204) **338-7613**

Fibrated Asphalt Roof Coating

Provides an economical means of recoating and preserving smooth surface asphalt roofs.

Available in 18.93L.

Quick-Dry Asphalt Primer

SPAR-Marathon Quick Dry Primer is a fast drying asphalt primer to use in multiple roofing applications - wood, metal, concrete and masonry.

Available in Aerosol Spray.

Asphalt and Concrete Primer

An asphalt primer intended to use on concrete, masonry, wood deck and parapet walls prior to application. Available in 18.93L.

SPAR-Marathon • •••

Leak Seal

- Swells to form a non-hardening gel on contact with water
- Can be removed easily with a shovel to affect permanent repair.
- Use as emergency repair.
- Use as night seal on re-roofing projects
- 15.88 kg/35 lbs

Hydroshield

For repair of wet or dry roofing, metal or masonry surfaces. Has special bonding abilities to wet surfaces, excellent rust inhibiting characteristics and outstanding weather resistance. An ideal waterproofing and damp-proofing compound for a wide variety of applications. Trowel on or brush on formulas available 18.9 L.

Vapour Barrier & Roofing Adhesive

Vapour Barrier & Roofing Adhesive is a fast setting asphalt in a nonflammable solvent carrier used to adhere kraft paper, base sheets and insulation boards to concrete, steel and gypsum decks. Product may also be used for reducing dampness and moisture infiltration through foundation walls, parapets, etc. This product is ideal for applications where open flames will be used to apply the roofing system. 18.93L.

Liquid Rubber[®]

Liquid Rubber Seam Tape

Liquid Rubber Seam Tape makes surfaces watertight and is combined with Liquid Rubber coatings to create a superior and faster method of waterproofing over conventional applications.

• 4" x 50'

Waterproof Sealant

- Easy to apply brush, roller, and squeegee
- Flexible technology
- Fast drying
- Excellent UV, adhesion & chemical resistance
- Excellent freeze/thaw resistance
- Provides corrosion protection
- Resists cracking, chipping, peeling, impact & abrasion
- Withstands extreme hot & cold environments
- Water-based
- Zero VOC's, environmentally safe
- Available in 3.78L and 18.9L pails
- Colours Black, Light Grey

CEMENT & COATINGS 306

LUCAS

Coatings & Mastics for the Roofing & Waterproofing Trades

Lucas #6000 Universal™ **Roof Coating**

Lucas #6000 Universal™ Roof Coating is a solvent-based Terpolymer coating intended for the repair and restoration of asphalt. modified bitumen, metal, Kynar®, concrete, TPO, Hypalon® (CSPE), PIB and EPDM roofs. Extremely fast drving. Skins over in minutes and cures completely in a few hours. Won't wash off or pick up debris. Lucas #6000 is available in Energy Star white and custom

colors. When installed in white, #6000 will reduce theroof's surface temperature which reduces stress from daily heat cycles. It will also reduce the heat gain in the building's interior, any associated air conditioning costs and increase the efficiency of roof mounted air conditioning condensers.

Lucas #6500 Universal™ **Flashing Cement**

Lucas #6500 Universal™ Flashing Cement is a solvent-based Terpolymer sealant intended for the repair of asphalt, modified bitumen, metal, Kvnar®, concrete, TPO, PVC, Elvaloy®/PVC, Hypalon® (CSPE), PIB and EPDM roofs. Extremely strong and elastic. High elongation and tensile strength insure performance under conditions that will cause asphalt-based cements to fail. Unique surface active additives allow application to wet or underwater surfaces #6500 is the ideal maintenance and repair product for all roofs in all weather. Available in 1 gallon and 3 gallon pails.

Lucas #776 Elite[™] **Flashing Cement**

Lucas #776 Elite[™] Flashing Cement is designed as a super-premium, high-performance flashing cement intended for use on modified bitumen and asphalt roofs. It is also an excellent cold process inter-ply adhesive for SBS modified bitumen singleply membranes. Cold process adhesives eliminate the need for hazardous torches and hot asphalt kettles. Also an excellent form tie cement for use with rubberized asphalt waterproofing systems.

Metalmaster® Compound Action Snips

Left Cut, Cuts left from tight curves to straight **M1R**

Right Cut, Cuts right from tight curves to straight

M3R Straight Cut Snips

- Narrow body of snip allows metal to pass freely over snip while cutting.
- The spring-action design allows for fast, effortless feed.
- All-new latch design provides ergonomic singlehanded operation for left or right handed users. Available in left/straight cut, right/straight cut, and straight cut.
- New extended non-slip handle grips give users better control while cutting.

Straight Pattern

- Cuts straight and wide curves (when trimming light guage stock)
- For plumbing, heating, air conditioning and roofing trades, also used as handyman's tool
- Blades individually hand edged for maximum cutting efficiency
- Flat face guides tool along straight line
- Blades of finest quality steel, hot drop-forged for sharp edge and long life
- · Rust resistant blades
- Cushion handle for comfort and better grip

Duckbill Pattern

- Duckbill blade design makes tight left or right curves and straight cuts easier.
- Larger handle rights and comfortable cushion grip.
- Steel blades for maximum strength and longer life.
- · Precision ground cutting edges
- · Adjustable pivot bolt

5 Blade Hand Crimper

- Joins sheet metal pipes of same size that are corrugated, round or square
- Compound action iaw
- Jaw of finest quality steel for better edges and lona life
- Bust resistant blades
- Cushion handle for all-weather comfort
- Matte black finish and red plastisol grip

Hand Seamer

- Produces a permanent tight fitting seam
- Compound action jaw
- 1/4" incremental depth marks on iaw
- Jaw of finest quality steel for better edges and long life
- **Bust resistant blades**
- Cushion handle for all-weather comfort
- Matte black finish and red plastisol grip

Offset Hand Seamer

- 1/4" incremental depth marks on jaw
- · Compound action jaw for easy metal bending and flattening
- · Jaw of finest quality steel for better edges and lona life
- Rust resistant blades
- Cushion handle for all-weather comfort
- Matte black finish and red plastisol grip

R D

8" Multi-Purpose Straight Shears

- Stainless steel serrated blade.
- · Ideal for cutting sheet metal.
- · Lightweight and durable anti-slip handles for a comfortable grip.

10" Multi-Purpose Offset Shears

- Stainless steel serrated blade
- Ideal for cutting sheet metal.
- · Ergonomic handle.
- · Adjustable range blade.

SERVICE IS OUR SPECIALTY · SPAR-Marathon

SERVICE IS OUR SPECIALTY

At SPAR-Marathon Roofing Supplies, Service is our Specialty

Our depth of product lines, in-stock availability, competitive pricing and unique services provide you with an unbeatable package.

Everything we do has the emphasis on Customer Service and Customer Satisfaction.

That's why we say "Service Is Our Specialty".

PRODUCTS

SPAR-Marathon offers the most complete assortment of roofing and sheet metal products in the industry.

We've assembled a line-up of thousands of products from hundreds of manufacturers. This impressive array of national brands and smaller, hard-to-find manufacturers provides the roofer with an unequalled offering of roofing supplies.

We also continue to increase our own manufactured line of equipment and sheet metal products.

COMPLETE ONE STOP ROOFING CENTRE

A large and varied stock of roofing and sheet metal materials, hardware accessories and supplies. We are always updating and expanding our stocks for you, the Roofing Professional.

BULK PRICING AVAILABLE

Please ask one of our Customer Service representatives for assistance.

DEALER/DISTRIBUTOR

Dealer/Distributor inquiries are welcome. Please ask one of our customer service representatives for assistance.

HUGE INVENTORY

SPAR-Marathon has committed to the roofer unlike anyone else.

Our extensive inventory assures that you have the supplies you need, when and where you need them. Our in-stock availability and unbeatable selection covers all your needs, whether residential, commercial or industrial.

Rapid turnover keeps our inventory clean and new at all times.

GENERAL INFORMATION

Ample parking and customer loading area.

Not all products or services are available at all locations. Please call ahead. Products can usually be transferred to the location of your choice for pickup with one day's notice.

QUICK PICKUP

When picking up material at a **SPAR-Marathon** Super-Service Centre, we ensure that you are in and out fast! Our computerized order-taking actually prints your order in our warehouse while our Customer Service representative is taking your order. By the time you walk back to your vehicle, our shipper may already be at your truck, waiting with your order. *Now that's service*!

Orders for shipment are also processed quickly and efficiently. At **SPAR-Marathon**, we understand that time is money! Our quick service ensures that you are not waiting for your orders. Spend your time getting your job done, not waiting for supplies.

EQUIPMENT SERVICE

Our high quality equipment, mostly manufactured on site, means we understand what we sell. We also service and repair all types of equipment. We have the parts as well as new equipment in stock, ready when you are. Service is available at our Signet Drive location only.

348 SERVICES

SHEET METAL SERVICE

Each **SPAR-Marathon** Super Service Centre provides you with a wide variety of pre-made roof flashings, as well as drains, cones, scuppers, etc., in stock and ready to go.

Custom flashings and sheet metal products are all made-to-order to your specifications, quickly and professionally, in your choice of colours and gauges.

Sheet metal is stocked in a wide variety of colours and gauges and we can cut-tosize while you wait.

DELIVERY SERVICE

CALGARY, AB

(403) 255-8236

At **SPAR-Marathon**, we are committed to providing you with the services that you want, when and where you need them.

Our company fleet of trucks provide you with an unequalled delivery service for any size job.

We can also ship anything, anywhere, on common carrier, U.P.S., or Purolator.

With equipment designed for customer satisfaction and orders expedited quickly and efficiently, our delivery service proves that

Service Is Our Specialty!

In most cases, same day delivery is available. If orders are received before 8am; next morning delivery when ordered the day before.*

EDMONTON, AB

(780) 432-2786

WINNIPEG. MB

(204) 338-7613

*Conditions permitting. Delivery schedule will be confirmed at the time that the order is accepted. *Subject to location. Our *on-site fork lift and crane service* allows us to deliver where YOU want it. In most cases, we can put it close to the building, NEAR to where YOU have set up your ladder or hoist.

We can also provide our *Roof Lift Service* with our fork lifts. Provided you have TWO men to unload, WE can lift the material directly up to the roof for you to unload, greatly saving your time and money.**

**Maximum height is 24 feet and is subject to fork lift manouverability, safety restrictions and site conditions.

We can also provide our *Roof Lift Service* with our crane. Provided you have THREE men to unload, we can lift the material directly up to the roof for you to unload, greatly saving you time and money.***

***Maximum crane height is 60 Feet and is subject to site conditions, crane manouverability and safety restrictions.

Specific rules apply to each style of equipment we offer for delivery and may vary by location. Please ask if you have any questions. We're here to service you.

CONDITIONS OF DELIVERY

SPAR-Marathon Roofing Supplies' delivery record is exceptional in the trade, but, when unforeseen circumstances arise - for example, extreme weather conditions, mechanical failures, Ministry of Transportation checks or inspections, heavier than normal demand - our normal delivery situation may be affected.

We cannot be held responsible for delays beyond our control, or for work that was started prior to delivery of materials.

It is solely the customer's responsibility in all circumstances to confirm the receipt of the correct materials; colour, type, etc. If incorrect material is delivered, upon notification we will pick up and exchange on a priority basis. Under no circumstances will **SPAR-Marathon** Roofing Supplies be held responsible if incorrect materials are installed at the customer's jobsite.

Customer is responsible for driveway or property damage at requested site.

Job site limitations may prevent certain delivery equipment from being used.

TERMS AND CONDITIONS OF SALE

All prices, terms and product offerings are subject to changed without notice. All invoices will be at the value in effect at the time of shipment.

SPAR-Marathon reserves the right to accept or refuse any order. We reserve the right to select our own customers.

Our terms of sale are final. No returns, no refunds. Material cannot be returned for credit or exchange without our permission. If circumstances warrant, materials that are accepted for return will be subject to a minimum 20% handling charge.

Any materials that we are required to pick up from a delivery location will be subject to additional labour and/or handling charges.

Charge accounts are given upon receipt of satisfactory credit references.

Customer is responsible for incorrect material installed on jobsite.

WARRANTIES

Some warranties, such as EPDM and modified bitumen material warranties, are valid to licensed and authorized applicators only.

Some warranties, such as EPDM warranties and system warranties, are chargeable, and must be approved by a manufacturer's technical representative.

Some warranties must be registered with the manufacturer to become effective.

EPDM is recommended for Industrial Roofing Applications Only.

All warranties require material to be applied as per manufacturers recommendations and as per building codes.

Please make sure you have all the information you need on warranty, charges and approvals before you purchase the material or products.

SPAR-Marathon Roofing Supplies (a division of SPAR Roofing & Metal Supplies Limited) warrants all new equipment to be free from defects in material and workmanship. Under normal use and service, any part or parts found to be defective within THIRTY (30) DAYS from the date of the original sale will be repaired or replaced, providing that our inspection establishes the defect to be due to faulty material or workmanship.

SPAR-Marathon Roofing Supplies assumes no liability for the cost of labour or transportation in connection with the repair or replacement of any defective part.

This warranty shall not extend to any damage that may result from accident, careless handling or misuse, and in no event shall **SPAR-Marathon** Roofing Supplies be liable for delay caused by defects, for consequential damage, or expenses of any nature.

EQUIPMENT WARNING

Misuse of roofing equipment may result in damage or injury. **SPAR-Marathon** provides instructions for use and relies upon the purchaser to ensure that these instructions are given to the persons who will actually be using the equipment.

The employer shall permit only those employees qualified by training and experience to operate the equipment and machinery.

The employer shall instruct each employee in the recognition and avoidance of unsafe conditions and the regulations applicable to the work environment to control or eliminate any hazards or other exposure to illness or injury.

Regulations governing the use, selection, and maintenance of personal protective and lifesaving apparatus regulations must be followed.

The **SPAR-Marathon** Roofing Supplies Catalogue and its complete contents are copyright by Spar Roofing & Metal Supplies Limited and may not be copied or reproduced in any form without the prior written permission of Spar Roofing & Metal Supplies Limited.
