MODEL 3000 UPRIGHT CARRIER

We have tried our Model 3000 Upright Carrier and our conclusion is as under---

There is absolutely no chance of tipping if used on flat surface under normal conditions. It can only happen if the angle of inclination is more than 22 degrees and nobody is holding it.

As illustrated in the sketch below it will not tip over even if the front wheels are dropped from 3" thick insulation, as the angle of inclination is 9 degrees, which is well below 22 degrees.
